

Allegan Downtown Streetscape Project

Date: July 28, 2023

Current Progress

Riverfront Plaza has been crested and sanitary sewer work now continues westward along Hubbard St. Behind the pipe crew, another Milbocker crew has begun sidewalk placements in downtown. As these sidewalks are replaced, affected property owners will be contacted in advance, and temporary walkways will be established as necessary.

As each sanitary service is connected to affected parcels, Severance Electric has been running conduits on Brady and Hubbard St. These conduits will carry electrical wires and other utilities underneath the sidewalks that Milbocker pours as the weeks go on.

Once again, as concrete work and excavations are performed at various locations in the downtown area, please refrain from disturbing or entering them so that concrete can cure properly without disfiguration and excavations can remain safe.

Upcoming Work

This coming week, sanitary sewer work will progress westward along Hubbard as conduit and lighting are placed on Brady and Hubbard St. Sanitary laterals are also being installed to existing buildings, but this should not affect any sanitary service. Any disruptions will be passed from the contractor to the property owner as necessary. As sewer installation continues, foundations for lightpoles will also be installed. Once these utilities are placed, sidewalk will be poured as the downtown continues to be restored. Since these installations require concrete, please refrain from disturbing them to allow proper curing.

Throughout the project's duration, the contractor remains committed to minimizing disruptions and maintaining accessibility for residents and businesses. Sidewalks will be preserved as long as possible to ensure continued access. However, now that existing sidewalks are being actively removed, the affected property owners will be contacted in advance, and temporary walkways will be established as necessary.
