

## Addendum #1

### Town of Carbondale RFP Dog park Signs Graphic Design Project

- For confirmation, are you envisioning each sign has both English and Spanish included together or will there be separate signs for English and Spanish?  
*The rules that cannot be conveyed through universally understood symbols will need to be translated on the signs. We prefer to have the translation on the same signs.*
- Will the Town be providing Spanish translated content and/or editing and review or does that need to be developed/provided by your selected partner?  
*Translation can be provided by the Town unless you have that capability and that could be an add alternate to your proposal.*
- It appears that the manufacturing of the signs is not part of this scope but that you are seeking advice on materials. Do you have a vendor already in mind for the manufacturing so we could understand their capabilities and resources?  
*No vendor in mind. We have local sign companies that we use that are capable of producing signs in most materials. They are Roaring Fork Signs and Gran Farnum and MicroPlastics.*
- Will all of the signs share the same core content or are there any park specific information/rules that need to go on select signs?  
*There will be some slight changes in language of rules for the three locations, but the core content will be the same. This will be figured out once a contractor is on board.*
- Do you have a targeted budget for this project?  
*\$5,000*
- Do you require in person attendance for the in-person meetings with Town staff and Parks & Recreation Commission representatives or will virtual sessions be allowed?  
*No, if necessary these can be conducted via zoom.*
