

BASIC SAFETY

Ride on the right. On roadways, always ride with traffic. Bicycles may use the entire lane.

Leave plenty of room when passing parked cars to avoid opening doors.

Be predictable. Always ride in a straight line. Do not weave from side to side or suddenly move out into traffic.

Be alert and plan ahead to avoid obstacles.

Always check over your shoulder before changing your lane position.

Never weave between parked cars.

Obey traffic signs and signals.

Use hand signals. It can be as simple as pointing in the direction you plan to go.

Yield to pedestrians.

On the bike path, alert others of your approach by ringing a bell or horn or by announcing, "Passing on your left."

Riding on sidewalks jeopardizes walkers.

WHY BIKE?

Cycling is an easy way to add exercise and activity to your day.

Cycling builds strength and muscle tone.

Cycling is a good way to build stamina.

Cycling gets your heart pumping at a steady rate, improving cardiovascular fitness.

Cycling eats up calories.

Cycling involves the whole body (arm-to-leg, feet-to-hands, body-to-eye), which improves coordination.

Regular exercise can reduce stress and depression and improve well-being and self esteem.

Riding a bike or pushing a stroller gets you and your family outside!

Have fun!
