Re: COVID-19 Precautions

Chillicothe Transit System is taking precautions as directed by the local health district and CDC recommendations to ensure a safe ride for our passengers. In response to the COVID-19 pandemic the following procedures have been implemented:

- Masks are required on all buses. If an individual is unable to wear a mask due to a disability or medical condition, please see [*CTS Mask Requirement and Reasonable Modifications*](#).
- Capacity on the bus is limited to 10 riders, plus the driver. The driver will be separated by a plastic barrier from the passengers.
- Buses are cleaned between routes and fogged every 4 hours.
- Single rider van transportation service is available for individuals at increased risk/vulnerability of COVID-19. Vans are fogged between every ride for extra precaution.
- Hand sanitizer dispensers have been installed in the buses and are available for passengers to use when boarding or exiting the bus.
- Individuals showing signs or symptoms of COVID-19 are asked not to ride. If a rider needs transportation for testing, they can contact dispatch to schedule an individual ride with additional safety protocol in place.

If you have any concerns or questions regarding transportation during this unique time, please call 740-773-1569.
