ORDINANCE NUMBER 2022-13

AN ORDINANCE OF THE CITY OF BUSHNELL, FLORIDA, AMENDING THE CITY OF BUSHNELL CODE OF ORDINANCES, SPECIFICALLY AMENDING CHAPTER 27, UTILITIES, ARTICLE III – WATER AND SEWER SYSTEM, PART III – SEWER SYSTEM, DIVISION 2 – WASTEWATER DISCHARGE PERMIT, SECTION 27-258 – MONITORING FACILITIES, BY ADDING SUBSECTION 27-258(e)4, RESTRICTING THE ACCEPTANCE OF LEACHATE OTHER THAN FROM THE LAKE PANASOFFKEE LANDFILL; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the City Council of the City of Bushnell, Florida, has reviewed the City's ordinances pertaining to the City's water, electric, and sewer utilities as set forth in Chapter 27 of the Code of Ordinances of the City of Bushnell, Florida; and

WHEREAS, the City Council of the City of Bushnell, Florida, has determined that in order to promote and serve the best interest of the health, safety, and welfare of the citizens of the City of Bushnell, Florida, it is appropriate and proper to amend and adopt changes to Chapter 27 of the Code of Ordinances regarding the introduction of leachate into the City's sewer and wastewater system; and

WHEREAS, the City Council of the City of Bushnell, Florida, has determined that it is in the best interest of the health, safety, and welfare of the citizens of the City to only allow the introduction of leachate into the City's sewer and wastewater system from the Lake Panasoffkee Landfill.

NOW THEREFORE, BE IT ORDAINED AND ESTABLISHED BY THE CITY COUNCIL OF THE CITY OF BUSHNELL, FLORIDA, THAT CHAPTER 27, UTILITIES, IS HEREBY AMENDED TO ADD THE FOLLOWING SECTION:

Sec. 27-258. Monitoring facilities.

(a) The city shall require to be provided and operated, at the user's own expense, monitoring facilities to allow inspection, sampling and flow measurement of the building sewer and/or internal drainage systems. The monitoring facility should normally be situated on the user's premises, but the city may, when such a location would be impractical or cause undue hardship on the user, allow the facility to be constructed in the public street or right-of-way area and located so that it will not be obstructed by landscaping or parked vehicles.

(b) There shall be ample room in or near the sampling manhole or monitoring facility to allow accurate sampling and preparation of samples for analysis. The facility, sampling and measuring equipment shall be maintained at all times in a safe and proper operating condition at the expense of the user. Whether constructed on public or private property, the sampling and monitoring facilities shall be provided in accordance with the city's requirements; and all facilities shall be provided in accordance with the city's requirements and all applicable local construction standards and specifications. Construction shall be completed within 90 days following written notification by the city.

(c) Lift station shall be included as monitoring and pretreatment facilities.

1. The facility shall be maintained to meet city and FDEP requirements.

2. No modification should be made to the facility without permission of the city and FDEP.

3. This facility shall be maintained at owner's expense.

4. Some lift stations may have grinder pumps or grinder equipment that has to be maintained to meet city and state requirements. (e.g.; muffin monster).

(d) Grease, oil and sand interceptors:

1. Grease, oil and sand interceptors shall be provided when, in the opinion of the Director, they are necessary for the proper handling of wastewater containing excessive amounts of grease and oil, or sand except that such interceptors shall not be required for residential users. All interception units shall be of the type and capacity approved by the Director and shall be located as to be easily accessible for cleaning and inspection. Such interceptors shall be inspected, cleaned and repaired regularly, as needed, at the owner expense. The city reserves the right to monitor the interceptor to ensure that the correct maintenance is being performed.

Grease interceptors are not required for a residence. However, one or more grease interceptors are required where grease waste is produced in quantities that could otherwise cause line stoppage or hinder sewage disposal. The design of grease interceptors shall be based on standards found in (1.) below. In addition, the following general requirements found in (2.), (3.), and (4.), apply when determining the proper use and installation of a grease interceptor used as a component of an onsite sewage treatment and disposal system.

1. The inlet invert shall discharge a minimum $2 \frac{1}{2}$ inches above the liquid level line and the outlet pipe shall have a tee with a minimum diameter of 4 inches that extends to within 8 inches of the bottom of the tank.

2. Interceptors must be located so as to provide easy access for routine inspection, cleaning and maintenance. Manholes shall be provided over the inlet and outlet of each interceptor and be brought to finished grade.

3. Where a grease interceptor is required or used, only kitchen wastewater shall first pass through the interceptor.

4. Sizing of grease interceptors shall be based on the equations below. The minimum volume of any grease interceptor shall be 750 gallons and the maximum volume of an individual single grease interceptor chamber shall be 1250 gallons. When the required

effective capacity of the grease interceptor is greater than 1250 gallons, installation of multi-chambered grease interceptors or grease interceptors in series is required.

(a) Restaurants: (S) X (GS) X (HR/12) X (LF) = effective capacity of grease interceptor in gallons.

S = number of seats in the dining area.

GS = gallons of wastewater per seat; use 25 gallons for ordinary restaurant, use 10 gallons for single service article restaurants.

HR = number of hours establishment is open.

LF = loading factor: use 2.0 interstate highways, 1.5 other freeways, 1.25 recreational areas, 1.0 main highways, and 0.75 other roads.

(b) Other type establishments with commercial kitchens: (M) X (GM) X (LF) = effective capacity of grease interceptor in gallons.

M = meals prepared per day. GM = gallons of wastewater per meal: use 5 gallons. LF = loading factor: use 1.00 with dishwashing and 0.75 without dishwashing.

(e) Hauled wastewater and Leachate:

1. Septic tank waste may be accepted into the wastewater treatment facility at a designated receiving structure within the treatment plant area, or at another designated facility within the wastewater collection system, at the discretion of, and at such times as are established by the Director, provided such wastes do not violate the wastewater permits.

2. The discharge of hauled or pumped industrial wastes such as leachate requires prior approval from the city and FDEP. The Director shall have the authority to prohibit the disposal of such waste, at any time if such waste would interfere with the treatment plant operation or violate the wastewater permits.

3. Fees for dumping septic or leachate are established as part of the miscellaneous/industrial user fee based, on the discretion of the director.

4. No leachate shall be introduced, inserted, or injected into the city's sewer and wastewater system except leachate from the Lake Panasoffkee Landfill.

NOW THEREFORE, BE IT ORDAINED AND ESTABLISHED BY THE CITY COUNCIL OF THE CITY OF BUSHNELL, FLORIDA, THAT CHAPTER 27, UTILITIES, SECTION 27-30, IS HEREBY AMENDED AS FOLLOWS:

Sec. 27-30. General service, demand electric service.

- (a) Availability. This schedule is applicable to:
 - (i) electric service at a single metering point throughout the entire territory served by the city for all service with a minimum demand of fifty (50) twenty five (25) kilowatts or greater for more than six (6) months out of the twelve (12) consecutive months ending with the current billing period; and
 - (ii) electric service at a single metering point where such meter (a) was a prior customer of Sumter Electric Cooperative ("SECO") on or before October 7th, 2019, (b) was transferred to City service on or around October 7, 2019, and (c) was eligible for SECO's then in effect General Service Demand rate.
 - (iii) Availability of this schedule for customers under this subsection (ii) is limited solely to the customer(s) of record as of the date of transfer from SECO to the City, and for a

period of 24 months thereafter. Upon the earlier of expiration of such 24-month period or the customer of record changes, continued eligibility under this schedule shall be subject to the criteria in (i) above.

Customer may choose to receive service pursuant to the general service nondemand rate if the monthly energy usage is less than twenty thousand (20,000) kilowatt hours per month for more than six (6) months out of the twelve (12) consecutive months ending with the current billing period. Customers that choose to receive electric service pursuant to the general service nondemand rate must receive such service for a minimum of twenty-four (24) consecutive months.

(b) Character of service. Service to be furnished under this schedule shall be alternating current, sixty (60) cycles, three- phrase at nominal 120/208, 120/240 or 277/480 volts, at the option of the city, depending upon the class of service available.

(c) Monthly rate.

(1) Customer charge: (SEE ARTICLE V, DIVISION II: ELECTRIC) per metering point.

(2) Demand charge: All kilowatts of billing demand at (SEE ARTICLE V, DIVISION II: ELECTRIC) per kW.

(3) Energy charge: All kilowatt hours at (SEE ARTICLE V, DIVISION II: ELECTRIC) per kWh.

(d) Minimum charge. (SEE ARTICLE V, DIVISION II: ELECTRIC) per month for the currently effective billing demand. (SEE ARTICLE V, DIVISION II: ELECTRIC).

(e) Billing demand. The billing demand is the maximum measured fifteen-minute integrated kilowatt demand established during the billing period adjusted for power factor, if applicable. The City reserves the right to periodically evaluate billing demand to determine continued eligibility under this rate schedule.

(f) Power factor. Service under this rate schedule is predicated upon the customer maintaining a power factor of ninety (90) percent or higher. When a customer does not maintain the required power factor, the measured kilowatt demand may, at the option of the city, be converted to KVA, in which case the billing demand shall be ninety (90) percent of such kVA.

(g) Applicable clauses. The power cost adjustment clause (section 27-34) and the tax adjustment clause (section 27-35) are applicable to this section.

(h) High load credit factor

(1) Applicability to any demand customer served under the city's general service demand electric service tariff which had a billable demand level with a minimum demand of fifty (50) kilowatts and whose load factor averaged sixty (60) percent or higher during

the previous twelve (12) monthly billing periods, as calculated on April 1 and October 1 of each year, and which has executed a five-year general service—high load factor service agreement with the city. The credit for the average high load factor will remain in effect through the individual's six-month interval. Resale of energy purchased under this rate schedule is not permitted.

(2) Monthly demand credit rate. For any billing period for which a demand customer's load factor shall be sixty (60) percent or higher, a high load factor demand credit in the amount shown below will be applied to the customer's bill.

Load Factor	Monthly Demand Credit	
75 percent or higher charge	\$1.80 per kW demand	
70 to 74 percent charge	1.30 per kW demand	
65 to 69 percent charge	0.80 per kW demand	
60 to 64 percent charge	0.30 per kW demand	

(3) Determination of load factor The customer's load factor:

(LF) for any billing period shall be determined by the following formula. LF = ME/(MPD x DEW x 24) Where ME = metered energy in Kwh for the billing period MPD = metered peak demand in kW for the billing period DBP = number of days in the billing period

The load factor as determined by the above formula will be expressed as a whole percent amount with fractional amounts being disregarded.

(4) Term of service. Service under this rider shall be for a minimum initial term of five (5) years from the date of execution of the general service - high load factor service agreement with the city. Customers desiring to terminate service under this rider shall give the city a minimum of forty-eight (48) months prior notice prior to transferring to the city's standard rates, or if allowed by law, receiving service from another provider of electricity.

(5) Penalty for early termination. A customer who elects to terminate the general service - high load factor electric service agreement with the city with less than the required forty-eight (48) months' notice will be subject to an early termination penalty if service is subsequently received from another provider of electricity. The customer electing early termination shall pay, as early termination penalty, an amount equal to the high load factor credits received during the prior forty-eight (48) months. The customer agrees that the city has incurred revenue loss of this amount and shall not be required to justify this amount.

SUMTER COUNTY SCHOOL BOARD

2680 W C-476, Bushnell, Florida 33513 – http://www.sumter.k12.fl.us *Preparing the Next Generation Today!*

Dear Friend of Education:

This is an invitation to participate in the 38th Annual Sumter School District Scholarship Golf Tournament scheduled for Saturday, April 30, 2022 at 2pm at <u>Evans Prairie Country Club</u> in The Villages, Florida.

During the past thirty-eight years, this scholarship tournament has assisted hundreds of students with the continuation of their education at Lake-Sumter State College. In 2021 the SSGT awarded \$17,500 in scholarships to thirteen students. Each year we are able to continue awarding scholarships due to the dedication and generosity of our volunteers, golfers and sponsors.

Our sponsors play an extremely important role in achieving our goal of providing financial assistance to deserving students. Sponsor signs are prominently posted during the tournament. This is an excellent way to advertise your business and to demonstrate your support for students at South Sumter High School and Wildwood Middle High School as they strive to continue their education. We value the continuing commitment that our sponsors, golfers and volunteers provide each year.

Your support is vital, if we are to continue assisting our students. We hope you will plan to join us during this scholarship golf tournament at **Evans Prairie Country Club** on **Saturday, April 30, 2022** as a golfer, a sponsor - or perhaps both. Please see the enclosed golf and sponsor registration forms for details.

If you have a friend who would be interested in participating in the golf tournament, please share this invitation letter with them.

Thank you for your continuing support of our students and the Sumter School District Scholarship Golf Tournament.

Sincerely,

Richard a. Shulle

- Completed February meter reading.
- Completed 100 various locates.
- Service orders 63 completed.

Monthly Outage Tally

We have three recorded outages for this period. One was an unexplained fuse blown that did not have the appearance of an over current failure, it could have been just a mechanical failure of the actual fuse. We also had a motor vehicle accident at Lowery's True Value, this was reported to the electric department at 12:53PM and restored by 1:30PM. The vehicle traveled over the curbing striking the transformer and moving it off the base shorting out the secondary wires. Third outage was a squirrel at Kenny Dixon Sports Complex, damaged a lighting arrestor and a elbow on the transformer within the park.

Miscellaneous

- Crews have been inundated with locates due to this boring project around the city.
- Work on Osmose pole replacements are still a work in progress.
