

Davenport Water District
Public water supply
June 15, 2024

This letter is to ask for your help. This October, all water districts must submit a Lead Service Line Inventory. The Department of Health is working to locate all lead lines in the state. We need to identify the lines that enter your residence. We need your help in completing this task. If we fail to complete the task, we will be subject to fines.

What you can do to help:

Send your information to
moller.paul@charlottevalley.org
Or Text 6072872462.

- 1.) Please send your address.
- 2.) Please send a picture of your residence from a street view.
- 3.) Please locate where the water enters your home in the basement and send a picture of the pipe that enters your residence.

This information will be included in the report. Please submit it by July 19th. If you can't submit it, a water district representative will need to come to your home and obtain the photos. If you need assistance obtaining the photos, please call.

Thank you for your help
Paul Moller
