

Road Dept. 2nd Quarter 2018 Report

The road dept. has continued to do maintenance on town roads as equipment breakdowns have allowed. Rip-Rap was installed on the northwest corner of Dinkle Rd and Futures Rd to minimize residents driving on the easement and breaking the edge of the asphalt off. We constructed and installed a desilting basin on the south side of Palomino Rd just west of Steeplechase Dr. to help catch mud and debris from clogging the culvert at Steeplechase Dr. In April we hired a contractor start crack filling on 17 miles of paved roads and that work is still continuing.

Sincerely

Norton Henninger

Road Supervisor
