### Road Dept. 3<sup>rd</sup> Quarter Report

The road dept. was only able to keep up maintenance on our base course roads during the months of July & August due to limited man power . At the end of August our staffing increased and we completed the fog seal on the section of Dinkle Rd. that we had done a double penetration chip seal of 6000 LF in June. On September 12<sup>th</sup> we installed 1650 tons of base course on Aspen Rd. and on September 13<sup>th</sup> we installed 1100 tons of base course on W. Venus Rd. in addition to maintenance on our other roads. We also completed the installation of a trench drain on a driveway on Entrada Del Norte for Mr. Frank Tapia to correct a drainage problem created when the road was paved last year. In the near future we have plans to install base course on homestead Rd , El Prado Rd , Entramosa Rd , E. Hill Ranch Rd & Moseley Rd.

Sincerrly ,

Norton Henninger
