

**Board of Supervisors Drainage Minutes  
Of  
December 13, 2021  
10:00 AM**

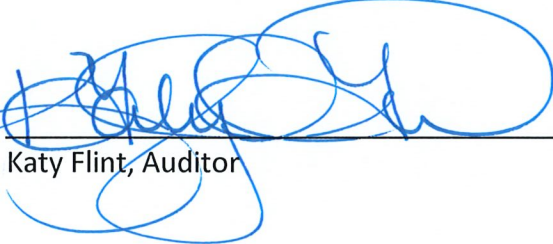

**Present: Supervisors Mike Nolte, Gary McVicker, Chris Vanness, Auditor Katy Flint, Joe Harrah.**

Joe Harrah went over what had been sprayed in 2021. There is a log jam in DD57. He also went through some problems in DD6. Vanness asked what size tree he manages. Harrah stated that usually anything over 10ft is not included. He stated that if he can take it down and has extra money remaining he'll remove it. If it involves the claw truck and other machinery he will come back to the Board. If he can take the tree down within the contract price, he doesn't include it. Vanness asked what size he sprays vs. snipping it. He stated that it depends on the situation. He clarified that he will prioritize DD48 next summer. He mentioned that he can increase the cost a little if they want and go through the ditch twice. He discussed options to manage DD48. Nolte mentioned that some of these ditches will need to be addressed more than every 3 years. Harrah stated that he'd like to work DD48 once a year until it gets under control. Vanness clarified that he does not have aquatic certification. He stated that that is more for spraying directly in the water. Harrah stated that a lot of them do need to be hit more than once every 3 years. He asked about changing the ending line of DD6 as well. Meeting ended at 10:20 AM.
