A landowner has requested data regarding the estimated drainage capacity of the Main Tile, Lateral 2, and the Main Open Ditch prior to and after the project. The landowner would also like all detailed invoices from Clapsaddle-Garber Associates for the project.

After discussing the questions from the landowner, the Board of Trustees agreed to have the drainage attorney review any information and to meet with the Auditor and Drainage Clerk. The Drainage Clerk will also notify Wright County since this is a joint drainage district.
