VILLAGE OF FRANKLIN

## 2023 Storm Rehabilitation Program

The Village of Franklin is pleased to announce that their contractor, Pipetek Infrastructure Services, will be moving on to the next division of work in the 2023 Storm Rehabilitation Program. This courtesy notice is to provide Village residents/property owners with general information on the scope of work of the project and the estimated schedule when to expect work to commence in your area.

**During the week of April 17, 2023** (weather permitting), the contractor will perform inspection and cleaning services in the storm sewers in Franklin Road between 13 Mile and Hersheyvale. (Please see attached map). Because the manholes that are used to access the sewers are within the roadway, Franklin Road will have one lane of traffic closed for the duration of the work; however, the contractor will also maintain one lane at all times with flaggers. The lane closure will be in effect between 8:00am and 4:00pm each day. The work is expected to be complete within one (1) week, weather permitting.

The work performed by the contractor will consist of sewer debris/sediment clearing, inspection via CCTV camera system, and condition assessment. A high-pressure water jet using water from a water truck will be used to clean the sewers while the camera is pulled behind from one end of the sewer to the other. If deficiencies are found in any of the sewers, rehabilitation or replacement of the sections would be scheduled at a later date. You will be notified in advance of the work.

If you have any questions or concerns, please contact the HRC field observer or any of the listed contacts below:
