

# recycle more

Every little bit counts.

**YARD WORK TO DO LIST:**

- ✓ Mulch leaves
- ✓ Recycle plastic plant pots
- ✓ Install compost bin

It's that time of year again! Mulch those leaves, recycle the plastic planting pots you bought your mums in, and install that compost bin so you'll be ready to compost those pumpkins and gourds once they're done bringing fall cheer. For more info, visit [Compost and Yard Waste](#).

Can I recycle candy wrappers?

Halloween tip: candy wrappers can't go in your recycling bin. However, you can recycle the plastic bags the candy came in (wherever plastic bags are accepted for recycling).

**RECYCLE AIR PILLOWS and BUBBLE WRAP**  
with plastic bags at a **RETAIL or GROCERY store.**

Always **POP** first!

Air pillows and bubble wrap are just two of the many other types of plastic film you can recycle with your plastic bags at retail or grocery stores. For more info, visit [Plastics Recycling](#).

**DO NOT RECYCLE MEDICAL SHARPS.**

They are **HAZARDOUS!**

Medical sharps, such as needles, syringes, lancets and injection pens, are not recyclable. To protect sanitation workers or anyone who handles your trash, they should be put into a tightly closed, puncture-resistant container such as a detergent bottle. There are also several [commercial mail-back programs](#) for sharps.
