---

February 6, 2023

Dear Mayor Pogue and Board of Aldermen,

The proposed budget for the fiscal year ending March 31, 2024 is submitted for your consideration. This budget is the result of a comprehensive team effort from every level of the municipal organization, which benefits the entire City of Kearney.

### Budget Process

Adoption of the annual budget is the Board of Aldermen's single most important duty. The City's budget is both a financial plan and a policy document for the fiscal year. The annual budget impacts the services that the City provides citizens today, as well as future services. The proposed budget for the Fiscal Year 2024 is the result of detailed and thoughtful consideration of the public service needs of the community and the goals and objectives of the Mayor and Board.

By addressing long-term financial challenges now, the City is able to avoid using existing fund balance on ongoing operations, allowing the City to preserve its reserves for critical long-term infrastructure and city facility needs.

The many decisions that are included in the proposed document do not allow the budget development process to be quick or easy. The annual budget begins with the City's available resources and then allocates those finite resources to meet the needs and desires of our citizens. Principal and interest payments on outstanding debt, as well as core and essential services always receive the highest priority when committing available funds. Still, all budgeting decisions are challenging due to the City's limited resources.

This budget has been prepared using the modified zero-based budget and target-based budgeting approach. This combined approach requires each department to prepare a budget request as if it were being done for the first time with the understanding that available resources should be dedicated to targeted service areas to address the goals of the Mayor and the Board. While taking historical context into account, requests were reviewed in line-item detail to ensure that they did not include incremental additions to prior year's budget numbers. Detail sheets were developed for each appropriate line item to allow for this review and to better serve as a management tool during the implementation of the budget. All pieces of the annual budget were analyzed and prepared by Department Directors and then reviewed and deliberated by the City Administrator and Mayor during department budget meetings.

A significant amount of time was spent reviewing both operating and capital plans to assure that available resources are having the greatest service impact for our citizens.

## Fiscal Year 2024 Highlights

For fiscal year 2024, the proposed budget complies with the State law requirement that total proposed expenditures not exceed estimated revenues plus any unencumbered cash reserves estimated to be on hand at the beginning of the ensuing fiscal year.

The budget includes appropriations for critical planning for the City's many infrastructure systems, including streets, stormwater sewer, water distribution, wastewater collection and the water and wastewater treatment plants. This planning includes master planning for infrastructure maintenance, the replacement of failing infrastructure that has reached the end of its life and planning for future growth.

Construction costs for the completion of the I-35 interchange project, including the roundabouts at 19th Street and Nation Road, are included in the proposed budget. Additionally, costs to construct Hall Park, replace the 12th Street culvert and replace the Shadowbrook storm sewer are included. Finally, costs to build a new million-gallon water tower and make water plant upgrades to modify the City's water treatment and disinfection process are also included in the proposed budget. The water tower and water plant upgrade and modifications will be funded during calendar year 2023 by the City issuing debt.

In calendar year 2024, voters are expected to have the opportunity to consider two ballot issues that would finance the construction and operation of an aquatic center. The costs to assess the community's vision and needs for an aquatic center and to design a concept plan for voters to consider, based on that vision, is included in this proposal.

Engineering and design costs for the Route 33 trail are also proposed in this budget.

Inflation and higher interest costs have impacted both projected revenues and expenditures for the proposed fiscal year 2024 budget. Sales tax revenue has been estimated to grow 8%, due to inflation and the anticipated opening of Starbucks and Arby's. Interest income has been projected to grow, while building permit revenues have been projected to decrease by 43%, due to higher interest rates. Charges for services have been projected to increase due to user fee increases which are necessary to cover higher operating costs for trash and recycling, recreation, water and wastewater services.

Attracting and retaining existing employees was a main priority this budget year. The labor market continues to be very competitive. The fiscal year 2024 budget includes a new proposed City salary plan for all budgeted positions and a one-step merit increase for all eligible employees on their anniversary date. In addition, funding for employee training and professional development has been increased and additional staffing has been proposed to alleviate employee burnout due to working excessive overtime and employees' inability to schedule time off. These adjustments will help the City

retain and attract quality employees that provide a high level of service that our citizens expect and deserve.

The entire budget document has been reorganized in an attempt to clearly reflect the true operating costs and capital costs of each service the City provides and to better align resources to those costs. This allowed the City to increase funding for public safety and public works, adding new positions and adopting a single consolidated salary plan for all positions that is consistent with the current rates being paid to other employees with the similar qualifications and work experience in the market.

## **General Fund**

The General fund is projected to end the year with a \$1.5 million fund balance, which is 22.6% of annual operating expenditures. Current year projected General fund revenues exceed proposed operating expenditures by only approximately \$8,800. This is less than ideal and is in part due to voters approving a reduction to the surtax levy on commercial real estate, which has reduced projected surtax revenues by \$25,000.

Voters will decide on April 4, 2023 if an additional 3% tax can be collected on retail recreational marijuana sales in the City. If the ballot question is approved, the new revenue stream will increase the City's current General fund revenues which could be used to provide public safety, park and other core services to citizens.

Utility franchise tax revenues are projected to increase after the addition of a payment in lieu of tax charge on the city owned water and sewer utilities at a rate of 5% of the operating revenues. The payment in lieu of tax will be assessed at the same rate applied to the commercial natural gas and electricity utilities operating in the city. The utility franchise tax is a gross receipts tax that allows the City to recover maintenance, inspection and other related expenses incurred as a result of the utility operating in the municipality.

Charges for General fund services are projected to increase after a change was made to the method of sharing common administrative costs between the funds. In prior years, these costs were paid entirely by the General fund. To correct this inequity, an analysis of the shared costs was made and all common administrative costs that support multiple City departments and funds were reorganized and budgeted in the City Hall department.

The General fund budget includes the addition of a Public Works department and a reorganization of existing positions, which were being funded by the Water & Sewer Revenue fund and Transportation fund in prior budget years, to the City Hall department. While the affected positions spend much of their time providing services to the operations they were previously being funded by, those positions also support other City departments. This change, along with distributing administrative costs paid entirely by the General fund, will allow expenditures to be more accurately allocated to the services they are supporting and legally restricted revenues.

The total operating costs of the City Hall and Public Works departments were analyzed and a formula for distributing those operating costs to the various funds was developed based on the approximate ratio of revenues for each fund compared to the overall city revenues. From that analysis, a distribution formula was developed. Generally accepted accounting principles and various legal restrictions require receipts and disbursements associated with specific activities to be reflected in the fund established to account for those activities. In future years, it is anticipated that this same distribution formula would be used.

The proposed General fund budget adds six new full-time positions to better address the public service needs of the community. The additional positions are an economic development director, a payroll/accounts payable clerk, two additional patrol officers, an assistant utilities and street director and a GIS/IT specialist position.

Additionally, \$288,400 is proposed for capital outlay expenditures, which includes \$30,000 to cover the Innovation Industrial Park interest payment contingency, \$10,000 to set aside and begin saving funds toward the future restoration of the exterior of the Historic Museum building and \$248,400 for police department capital purchases, including new radios and patrol vehicles.

### **Park Fund**

The Park fund budget has been reorganized to detail the costs of park administration, park maintenance, the amphitheater and park recreation programs, along with the related revenues. The General fund provides 65% (\$474,00) of the total operating revenues for the City's Park fund.

The proposed Park fund budget includes \$136,610 of equipment expenditures, including a larger tractor and automatic gates for the entrances to Jesse James Park and Mack Porter Park.

### **Transportation Sales Tax Fund**

The Transportation Sales Tax fund budget includes \$640,000 for street preservation costs, including a transfer to the Storm Water Projects fund in the amount of \$350,000 and \$1.3 million of capital expenditures. The majority of these expenditures are for infrastructure improvements which consist of \$690,000 for transportation and stormwater sewer system planning and \$398,000 for street mill and overlay projects. Equipment purchases are proposed in the amount of \$134,385.

### **Water Fund**

The proposed Water fund budget includes \$8.1 million in expenses. The majority of this expense is a transfer to the Water Construction Fund in the amount of \$4.1 million, which will be funded by debt financing, to construct a new million-gallon water tower to address current and future water storage needs and to make necessary improvements to the water plant which will address taste and odor problems.

The budget also includes \$1.9 million on services and supplies which have been significantly impacted by inflation, \$1.4 million for principal and interest payments on debt and costs of issuance to be paid at the time the City issues the debt this year, and \$0.5 million on personnel costs.

The proposed budget reflects a water rate increase to cover the cost of inflation and the additional principal and interest payments related to the new debt that will be issued to make the improvements to the water system and water plant. A resident's monthly water bill will increase \$1.68 for the minimum bill or first 1,000 gallons, \$1.46 for the next 1,000 gallons and \$1.31 for each additional 1,000 gallons thereafter. Doubling the discount that senior citizens receive each month, will offset the rate increase for residents aged 65 or older by \$2.

### **Sewer Fund**

The proposed Sewer fund budget includes \$2.5 million of expenses. The budget includes \$1.0 million for principal and interest payments on debt, \$0.9 million for services and supplies which have been significantly impacted by inflation, and \$0.3 million on personnel costs.

The proposed budget reflects a sewer rate increase to cover the cost of inflation and increased maintenance expenses. A resident's monthly sewer bill will increase \$3.22 for the minimum bill or first 1,000 gallons, \$2.05 for the next 1,000 gallons and \$1.82 for each additional 1,000 gallons thereafter. Doubling the discount that senior citizens receive each month, will offset the rate increase for residents aged 65 or older.

### **Water & Sewer Revenue Fund**

In prior years, the water and sewer systems have been operated as a combined water and sewer system. The proposed budget has separated the combined system into two separate systems to clearly reflect the costs of operating each individual system to allow user rates to be set at the appropriate levels, and liquidate the combined water and sewer revenue fund in the future.

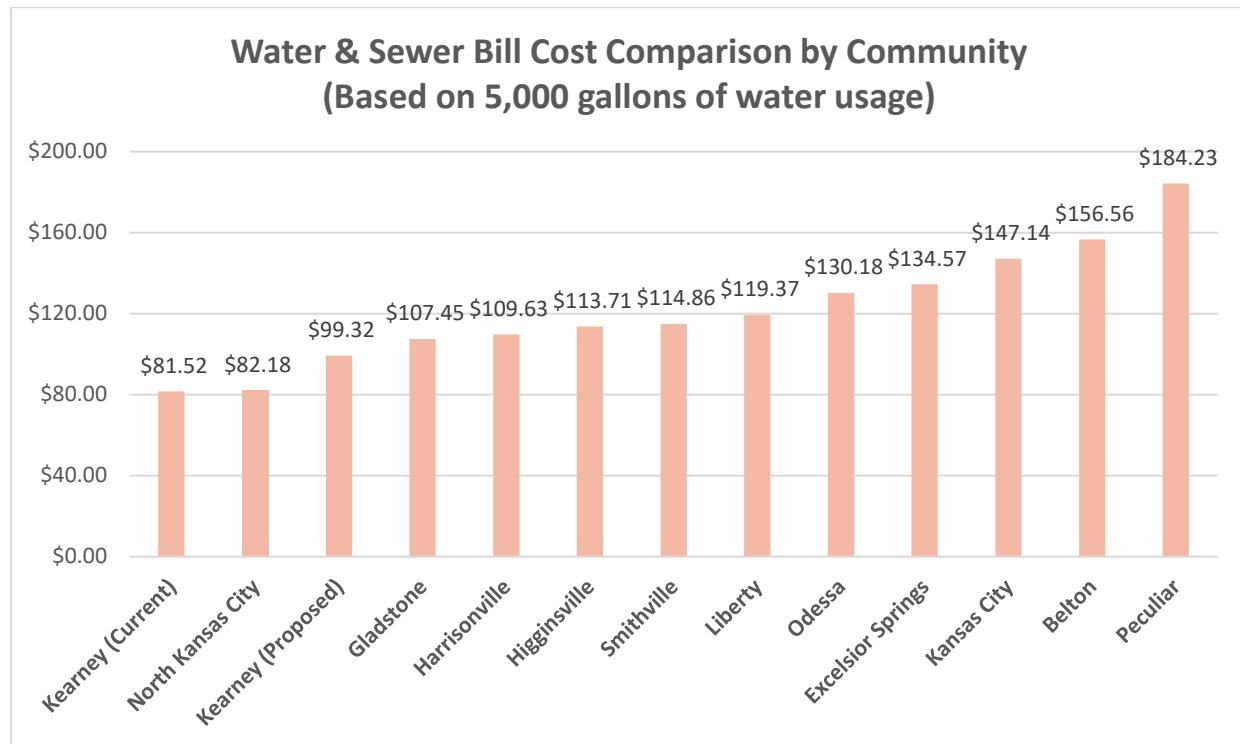

The proposed budget appropriates part of the remaining fund balance, that has accumulated in the fund from past operations, towards a required billing software upgrade and master planning for the water distribution system, wastewater collection system and the water and wastewater treatment plants.

In 2017 Lamp Rynearson, a professional civil engineering firm hired by the City, completed a water and sewer utility rate study. The study evaluated the water and sewer rates in place at the time and projected the rates that would be necessary, for the period 2018 -2022, to adequately cover operating expenses, as well as budget for normal inflation and future capital projects.

The City did not follow the recommendations. Even with the proposed fiscal year 2024 rate increases, the combined water and sewer rates will be lower than the rates that were recommended by the study to be in place by calendar year 2022.

To ensure that the City can continue providing water and sewer services to residents and businesses in future years, it is important that the City set rates at the necessary level to cover operating, maintenance and upgrade costs to the plants and distribution and collection systems.

For customers who uses 5,000 gallons of water in a month, the monthly combined water and sewer bill will increase \$17.80 per month, or \$13.80 per month for those with the senior discount. The increase for individual customers will vary up or down, based on the customer's actual usage.

## Acknowledgments

I have sincere gratitude for the department directors and the Mayor who worked very hard to help prepare this proposed budget for your consideration.

Very truly yours,

*Sheila Ernzen*

Sheila Ernzen, CPA  
City Administrator
