SYNOPSIS

Seeking death by throwing herself from Lone Mesa, to escape dishonor at the hands of a drunken desperado, Sonya Savarin allows herself to be rescued by her suddenly repentant at-tacker. The girl is a self-appointed physician to the Navajo Indians, living on an Arizona sheep ranch with her brother Serge, his wife, Lila, and their small daughter, Babs. She is engaged to Rodney Blake, wealthy New Yorker, but her heart is with the friendless Navajos and she evades a wedding. Sonya pulls Little Moon, wife of Two Fingers, a Navajo, through the crisis of an illness, Two Fingers is deeply grateful. Sonya again meets the man whose advances she had repulsed on Lone Mesa. He tells her he bitterly regrets his action. Sonya is affected, but unforgiving. She hears rumors of a Border bandit "El Capitan Diablo," and vaguely connects him with her attacker. On Lone Mesa she again reiterates his sorrow over his misconduct, she indicates forgiveness and urges him to abandon his life of lawssness. From concealment Sonva witan airship to the "man of mystery."

.CHAPTER V—Continued

__8__ After a long while Sonya climbed back on Darkness and went soberly ome. She had much to think about and was doing it with a vengeance. NEW LACE EFFECTS VELVET TOPS LACE SEEN IN LINGERIE By CHERIE NICHOLAS

Newest additions to lingerie col lections show fresh treatments of the embroidered and appliqued lace dec oration which is worked to contribute a "different" appearance by reason of the posing of two layers of net. In addition to giving much greater sturdi ness to this delicate form of trimming the use of the two layers gives a flower-like background which is not achieved by the single layer. Through this the flower appliques are worked or embroidery posed, or the lace ap pliqued.

The Household

By LYDIA LE BARON WALKER

TT IS a good idea for children to have small allowances. Pin money was the name given to allowances which were meant to be spent on trifles. This was when pins were scarce, and women wanted money with which to buy them. Pins were not considered essential, but desirable luxuries which indicated incomes above the necessities of life. To have pin money was a if they wanted a monopoly,

no depression at the moment, a great thinker, John Ruskin, wrote "No amount of pay can ever make a good soldier, a good teacher, a good artist, or a good workman." It is a saying that contains an undeniable truth. I is not pay which makes any work good, although good work is worth good pay. Just what good pay is depends upon the age or era. For example, in the World war prices soared to phenomenal heights. In the recent depression prices were extremely low. Just now there is the gradual return to the normal. But whatever the pay

for the work, its excellence should not be influenced. The worker should endeavor to reach a high level of excellence and maintain it. The underlying idea in the saving quoted is easy to find. There is a personal equation in all work whether it is craftsmanship, cooking, carpentry, plumbing—and so through all trades and arts. The worker decides whether he will do his or her best, or whether it shall be good only when the pay is high. The crudity of making the money value the criterion of excellence is recognized in a moment. And yet there are persons who slight their tasks unless pay is high. . Bell Syndicate.-WNU Service.
