The Head Restored

ing the custom of placing carved figureheads on the prows of their boats and once more these symbolical adornments are nosing into the wind as white-sailed vessels skip along over the blue waves of the Atlantic.

Time was when the art of carving ships' figureheads gave employment to many skilled workmen. In Boston alone there were no less than six firms engaged almost exclusively in supplying such emblems. That was in the old days of the great windjammers, when the swift Yankee clipper ships were the greyhounds of the ocean. In those days elaborately carved and gaily painted figures of angels and cherubs, beautiful women in flowing robes, generals in uniform, Indians in feathered war-bonnets and fringed garb, stern statesmen, kings and queens and gods and goddesses were set beneath the bowsprits as emblems of a tradition that had endured since first men went down to the sea in ships.

But when steam and steel replaced wind and wood, they took away much of the romance of the old seafaring days and with it the traditional figurehead. Today they are ("O tempora! O mores!") "landlubbers" in that you are more likely to find them in museums or set up on pedestals on private estates or in public parks than you are to find them in their proper place at the bow of a sea-going vessel. They are also "collectors items" in that they represent examples of so-called "American primitives" or "American folk art," sharing that distinction with such things as cigar store Indians and cast iron deer and dogs for lawn ornaments. (Incidentally, when those artisans who carved ships' figureheads were thrown out of work at the end of the clipper era; they turned their talents to carving wooden Indians for the traditional sign of the tobacco store and this helped keep their art alive for many years.) As collectors' items they frequently have a value attached to them greater than their makers ever could have dreamed they would have and as relics some of them have had more romantic histories than ever they had while they were voyaging on the waters of the

One of the most romantic is that of the figure of Andrew Jackson which once adorned the bow of the U.S. S. Constitution, the frigate affectionately known to all Americans as "Old Ironsides," and it was just a hundred years ago, in 1834, that this figurehead was the center of a bitter political row. "Old Ironsides" had no less than six different figureheads during her long and honorable career, but the Jackson figure had by far the most interesting history.

Built in 1797, the Constitution bore first a bust of Hercules, typifying the strength of union and the power of the new nation and carved by the Skillings brothers of Boston, renowned makers of ships' figureheads. But when, under the command of Commodore Richard Preble, "Old Ironsides" sailed into the harbor of Tripoli to attempt the conquest of the Barbary pirates, the figure of Hercules suffered severely from the effect of hostile shots and it was replaced by a figure of Neptune, said to have been taken from the wreck of a vessel in the Mediterranean.

During the second administration of Andrew Jackson, the Constitution was sent to the Charles Town navy yard near Boston to be rebuilt and reconditioned. At that time the dispute over the United States bank was at its height and when the "solid men of Boston" heard that Jackson had signed the order for removing its deposits to state banks, they were furious. Their anger was increased when they learned that L. S. Beecher, a famous Boston carver, had been commissioned to make a full-length statue of Jackson as a figurehead for "Old Ironsides." They tried to get Beecher to cease work on the figure but he refused and feeling became so intense that his half-carved block of wood was removed to the navy yard where he finished his work under the protection of a guard of marines.

The Whigs raised a terrific uproar over the matter, saying that no living man save perhaps James Madison, the father of the United States Constitution, should be accorded the honor of having his image adorn the ship named for that document and some of the sailors around Boston declared that placing an effigy of a landsman on the old frigate was an insult to her. Despite all the objections, the Jackson figurehead was put in place. But that didn't end the matter.

One dark, rainy night a sailor from Cape Cod named Samuel Dewey (whose grandson was destined for future fame as the "Hero of Manila Bay") rowed out to where the Constitution was riding at anchor between two other ships. Scrambling up over her bow, he set to work to saw off the head of the offending figurehead. But, because he was in a hurry and the light was so poor, he made his cut just beneath "Old Hickory's" nose and not at the neck as he had planned. But he succeeded in making his escape with the head and the Whigs were jubilant while the Democrats in turn raised a terrible uproar over the "outrage" that had been perpetrated.

Dewey next went to Washington where, after exhibiting it to the leading Whigs, he carried it tied up in a cloth to the Navy department where he sought an interview with Mahlon Dickerson, secretary of the navy. Then, according to a contemporary account, he was admitted to Dickerson's office, with the following result:

"Have I the honor of addressing the secretary of the navy?" asked the chunky sailor.

"You have, and as I am very busy, I will thank you to be brief," answered the secretary. "Mr. Secretary, I am the man who removed the figurehead, and I have brought it here to restore it," said Captain Dewey.

"You are the man who had the audacity to disfigure 'Old Ironsides?'" asked the secretary. in an angry tone.

"Yes, sir; I took the responsibility." "I'll have you arrested!" said the secretary, reaching out for the bell to summon a messen-

"Stop, Mr. Secretary!" answered the resolute sailor. "You, as a lawyer, know that there is no statute against defacing a ship of war, and all you can do is to sue me for trespass, and that in the county where the offense was committed. If you desire it, I will go back to Middlesex county, Massachusetts, and stand my

"You are right," said the secretary, after a moment's reflection; "and now tell me how you took away the head."

Dewey told the story, and Dickerson asked him to-wait until he had stepped over to the White House and showed the head to the Presi-

When President Jackson heard the story and saw the head, he burst into loud laughter. "Why, that is the most infernal image I ever

saw," said he. "The fellow did right. Give him a kick and my compliments and tell him to saw it off again." When the Whigs came into power later, Dewey

is said to have been rewarded with the appointment of a postmastership in a small Virginia town and to the end of his days he enjoyed the distinction of having been "the man who cut off Old Hickory's head." To add to that distinction he had printed on his visiting cards a picture of a hand-saw under which were the words: "I came; I saw; I conquered!"

The subsequent history of the Jackson figurehead is shrouded with mystery. According to one account, the head was restored and fastened on with an unusually large bolt to prevent a repetition of Dewey's feat. This figure, it is said, graced the ship for 40 years and had a narrow escape from another "outrage" at the beginning of the Civil war. Southern sympathizers planned to seize it as a sort of mascot for their cause, but were foiled by Gen. Benjamin F. Butler who marched the Eighth Massachusetts regiment to Annapolis and had "Old Ironsides" towed down Chesapeake bay to the protection of the guns at Fortress Monroe. After the Civil war, the figurehead was presented to the United States Naval academy at Annapolis and is preserved there today.

Another story is that a new figurehead of

Jackson was made for the Constitution after Dewey had decapitated him and that it is this replica which now stands on the academy grounds. The head which Dewey carried away, according to this version, did not turn up, despite the rewards that were offered for it, until many years later and this original, which sold a few years ago for \$15,000, is now in the possession of a private collector.

The Andrew Jackson figurehead, whether the original or a replica, is not the only famous one at the Naval academy in Annapolis. Even richer in tradition is that of a scowling Indian chieftain-"Old Tecumseh," the "God of 2.5"-which stands in front of Bancroft hall. This figurehead originally graced the bow of a ship-of-the-line, the Delaware, built in the navy yard at Norfolk, Va., in 1817 and was supposed to be a likeness of Tamanend, the most famous of chiefs of the Delaware Indians. (He was also known as Tammany, and as such became the patron god of the New York political society.

At the beginning of the Civil war the Dela- fatally about once among every ten ware was out of commission at the Norfolk navy yard. When the navy yard was destroyed in 1861 she was scuttled and burned, but after the close of the war what remained of her hulk was sold to wreckers, who raised and broke her up for copper in 1866-'67 and the figurehead was sent to the Naval academy, where after occupying protect the other children in the several sites finally in 1909 was placed on a pedestal facing Bancroft hall

Gradually the tradition of "Tamanend's" mysterious power of imparting knowledge was established. Also by this time he had been renamed "Tecumseh" by the middles and had become the "God of 2.5" (the passing mark at the academy). Later his powers were increased and he was charged with gaining victories for the navy teams. As the regiment of midshipmen departs for the big games each platoon gives a "lefthanded salute" to him that the Navy may win that day. Another ceremony is centered around "Tecumseh." When the final examinations are concluded the graduating class gathers before him to read its class history and pay final homage to his steadfast aid.

In more recent years the ravages of time were threatening "Old Tecumseh," so a movement, sponsored by the class of 1891, was put under way to replace the wooden figure with an exact replica in bronze. This was done about five years age but even though the midshipmen now toss their pennies before a bronze "Old Tecumseh" as they pass Bancroft hall and invoke his aid in the imminent quiz, the original wooden figurehead is still carefully preserved at Annapolis.

It has distinguished company in one of Grecian design which once graced the British ship Macedonian until that vessel was captured by Stephen Decatur, while in command of the U. S. S. United States during the War of 1812, one of a bust of Benjamin Franklin, which adorned the U.S. S. Franklin, launched in 1815, and another, taken from the Spanish Don Antonia de Ulloa, destroyed by Dewey at the battle of Manila Bay. Dewey's flagship at that battle, the Olympia, had an interesting figurehead. It was a bronze winged goddess of victory, holding aloft an eagle, and it was designed by the famous sculptor. Augustus Saint Gaudens.

The Buffalo (N. Y.) Historical society has a notable collection of ships figureheads, one of buildings and their maintenance and make their way to Czechoslovakia, the most famous being a bust only 19 inches high. It is a smiling woman, wearing a coronet and is supposed to be a portrait bust of Queen Caroline of England, since it was the figurehead of the steamer, the Caroline, which was built in the early part of the Nineteenth century. During the Upper Canadian rebellion of 1837, the Caroline was said to have been in the service things that will prevent illness and of the rebels and one night she was towed from her moorings in the Niagara river, set on fire his school environment. and set adrift. The charred timbers of the ship floated over Niagara falls, and were dashed to pieces on the rocks. But by some strange quirk of fate the smiling face of Queen Caroline survived the perils of both fire and water and was found comparatively uninjured in the lower Niagara river near Lewiston. @ by Western Newspaper Union.

Let Our Motto Be GOOD HEALTH BY DR. LLOYD ARNOLD

SCHOOL LIFE A HEALTH **ADVENTURE**

School in the minds of children and parents of children is a health adventure for all. During the summer, children are usually in a good state of health. They spend most of the time out of doors and so store up sunshine. Outside of a few digestive disturbances, caused by sunburn or you've got to have a gun that will bad water on some camping trip or overeating of picnic food, they have been quite generally free of ailments since early last spring.

Now how will they stand the fall and winter, housed as they will be for hours a day with some forty other children coming from as many different family environments? Will they be exposed to some disease, such as diphtheria, scarlet fever, whooping cough, or measles? Will there be an epidemic of colds? Will some child in the room show signs of tuberculosis, making never try to make a short barrel by you uneasy for the health of your

Particularly is school a health adventure for the child of five or six years who is entering for the first be relied on. A good gunsmith can time this new life of education, and frequently turn out a good job of who has never before been in close this kind providing the metal in the contact with other individuals than his own family group and his neighboring playmates. It is a critical time for this little John or little Mary. Every one gets accustomed to the invisible bacteria in one's own home. When a child starts school, he or she has an established community of bacterial life in the covering layers of the nose and throat that is much like the bacterial life in the covering layers of the nose and throat of the other members of the family. Now he enters another germ world completely. Each child transfers the germs from his own body through hands, pencils, coughing, sneezing, loud talking and shouting, to the nose and throat of other children. The school and recreation places become clearing houses for the exchange of the bacterial flora of the upper respiratory passages.

If your child has had tonsilitis, ade-

noids, or chronic sore throat, he or she will carefully collect, preserve and grow all the newly acquired germs from the forty or more other children. If your child, on the other hand, has a nose and throat that are perfectly normal, these organs will function so as to tend to destroy most of the new invisible visitors. As a result there will very soon be established a the nose and throat which is harmless to the child. Your physician can determine whether your child's nose and throat are normal. Abnormal and diseased tonsils and adenoids should be corrected before a child starts school. Diphtheria can be prevented by vaccination. You should have your child theria for the following reasons: First, or twelve cases of the disease. Diphtheria is a very serious ailment, one of the most serious a child encounters. Diphtheria is avoidable and it is useless to subject your child to this hazard. Second, you should want to school against getting diphtheria from your child. During the period of sore throat before the actual croup or diphtheria develops, a child spreads thousands of diphtheria germs, and is a serious menace to the health and even the life of his playmates. Third, vaccination will prevent the heart, kidneys or other body organs from damage which may develop as a consequence of the disease. Recovery from diphtheria may leave irreparable damage to vital body organs. Recently Doctor Armstrong of the United States Public Health Service reported that children vaccinated against diphtheria enjoy a resistance to other diseases more than unvaccinated children. It is a protection you should give your child.

Have your dentist see that your child has no decayed or defective teeth that will give trouble during the school year. The dentist can anticipate toothache and can repair the damage before the pain begins. And he can aid in advising diets to make healthier and stronger teeth.

not defective. A child does not know whether he has or has not good vision. Children who cannot see the printed line clearly do not recognize bad eyes as the trouble because they have never enjoyed correct vision. Satisfactory and rapid progress of your child in school will depend more upon the teachers, books or system of instruction. In educating our children we spend a lot of money for for the teaching staff, only too often forgetting the importance of health in the process. A properly trained school physician who devotes to his

However, no matter how much health supervision there is in the schools, the health of the child is primarily the responsibility of the parents. Give your John and Mary a good 1934-35 school year by start-

By Bob Nichols Shooting Editor, Field and Strea

ONE of the poorest guns in the world for the beginner in wingshooting to use is the close shooting full choke gun. In fact, for upland work the close bored gun is a poor gun for anyone to use, except in open plains country where birds frequently rise at 20 to 30 yards, in which case reach out and get them.

The choke in a shotgun barrel means the degree to which its bore is constricted at the muzzle. The shot charge traveling through a full-choke barrel is suddenly squeezed together just before it reaches the muzzle. The effect is to cause the shot pellets to hang closer together, which results in a pattern of small diameter and maximum density. The construction, or choke, is in the first two or three inches at the muzzle. For this reason sawing off three or four inches at the muzzle. You will ruin the gun. Thereafter your gun will throw a wide, uneven pattern that can't barrel is not too thin at the point where it is sawed off. His trick will be to start back about an inch or two from where he sawed the barrel, and then bore the barrel out slightly from there down towards the breech. This method is called recess choking, or "jug" choking. The results are apt

to be somewhat of a gamble. Only the good wing shot is capable of doing good work with the full choke gun. The small diameter shot pattern it throws takes close expert holding. And in thicket and brush shooting such a gun is a "pesteration." You can't let your game get too far away or you lose sight of it, and if you shoot at close range you mince the bird and ruin it for the table.

Capt. Ed C. Crossman, the wellknown rifle expert, tells the amusing story of the man who went into the hardware store and asked for a "close shooting" gun. Naturally the clerk sold him a full choke gun. Several days later the irate customer barged into the store and demanded his money back-either that or another gun. "This ain't a close shooting gun," he complained. "I shoot at a rabbit at 20 yards and she blows him to pieces.

She's a far shooting gun!" The full choke gun is a very special weapon. Its use is justified only in different kind of bacterial flora in a few kinds of field sport. And under no circumstances is the full choke the right gun for anyone but an expert shot. Pass shooting on ducks usually calls for all the range one can get out of his gun, and it is here that nothing but the full choke should be considered. But such shooting is not for the novice. In fact I do not believe there immunized or vaccinated against diphi is more than one shot in a hundred who is capable of knowing how to lead to prevent an illness that terminates | fast flying ducks at 50 to 60 yards, and even he will have to do a lot of guess work. For the speed of high flying ducks varies. On a calm still day it is one speed. On a windy day with the birds traveling against the wind, it is another. And when they are coming down-wind plus their normal fast flying speed, then it's decidedly something else again. Flying or running game must always be "led" in order to score hits. That is, you've got to shoot ahead of it. Why this is so will be explained in a later article.

> The best gun for practically all upland shooting is the one with barrel bored improved cylinder. If a doublebarrel gun, make the first barrel improved cylinder and the second modified choke. The gun should be light enough to handle fast, from six to six and a half pounds, for the faster your gun handles the better you will shoot it. Without hurry or confused haste, one should be able to let off his first shot within half a second after the butt touches the shoulder. When you take longer time your muscles begin to "freeze" into rigidity—the result you slow up or stop your swing. With a fast handling gun you do not need the longer range of the full choke gun. Your improved cylinder will do the work, and it will teach you to shoot a shotgun the way such a gun should be shot-fast and instinctively.

"Airway of Storks" Has Also see that your child's eyes are

Been Accurately Traced Migration of storks has been studied for years by Germany, Denmark and other European countries and the "airway of the storks" has now been traced. Thousands of storks have been marked and a record kept of their coming and going. Of the 800 upon his or her state of health than | ringed storks which left Denmark last August reports of nearly 400 have been received. Leaving Denmark, the storks fly to Germany. Then they Hungary, Rumania, and across the Bosphorus to Asia Minor, but it is not yet known whether they fly to Egypt through Palestine or across the Mediterranean. In Egypt they travel. down the Nile, past the Great Lakes. eventually reaching Natal or the Cape, where they settle down for a sunny spell. About August 20 the storks leave Denmark and are back by the middle of October.

No White House Ball Room

There is no ball room, as such, in the White House. The drawing room, known as the East room, where dancing occurs after state receptions and similar functions, is on the main floor,

Flame of the Border Divers See Odd Aquatic Life at Record Depths

CHAPTER XI-Continued

But he followed closely at their heels while Marston, Serge, and Rodney Blake walked about the scantily stored front room, looked under counters, in tipping bins and behind doors. They entered the storeroom behind with its stacks of packing cases, barrels, the usual jumble of merchandise and its containers which litter such a place. And here the red left Parks' face. It became waxen, like a moon in fog.

But none of the three men noticed it.

Serge was too violent with sorrow to notice much of anything, and Rodney Blake was cold to his very vitals for the same reason. Ever since the sound of Darkness' running feet had brought him into the patio at home he had been like a man in a trance. The bottom had fallen out of life for him, but there was in the emptiness a terrible blackness of suspicion. First of the Indians: then of Sonya herself.

He was following Serge and Marston here and now, would follow them some hours longer. Then he knew what he meant to do himself, what campaign of searching he would begin, and his always thin lips drew into

As the three men explored an ong the disorder of the place the proprietor kept close to them, and once when Marston raised the lid of a bin of dry beans the muscles of his right hand rose along the back, exactly as the body of a cat tenses before it leaps. Marston dropped the lid, and the hand relaxed.

"There is nothing here," Serge said

They went to find the sheriff and see how many men he had sent out, in which directions.

And back at the ranch Lila, who had held her tongue, looked in the face of Myra Little and poured out in a flood all she knew of Sonya and Starr Stone. Myra, who had come as fast as her two good horses and a bouncing buckboard could bring her when she heard the news from a Navajo runner who had passed her place.

"My Lord!" she said aghast. "You think-that maybe she's gone with him? Run off?"

"What else?" said Lila miserably. "She loves him. And Rod Blake has said he'll never give her up to any

"H'm-yes, maybe you're right. She told me of this man-what kind of eyes he had. Blue eyes, wild an' excitable—with pupils that spread easily. I'se seen their like-once in a preacher who never should have been one, an' in an outlaw at Laredo. Strange eyes they are, an' strange men who own 'em, an' women can't forget them, ever. Maybe you're right, Lila. He'd take her-an' she'd go-if she loved

"She does," said Lila with convic-

And all among the Bad Lands, in the scattered canyons, along the sagebrush levels, a peculiar thing was happening. From every crevasse of the lonely land where she had worked for, loved, and befriended them, the Navajos were coming: tall brown men on sorry horses, their long hair bound on their heads beneath their widebrimmed hats, their turquoise neck laces swinging on their breasts.

They met and spoke in soft clipped voices, parted, and went appointed ways, their dark eyes on the desert's floor, scanning the open book of the world around, a moving network of de-

It was Hosteen T'so who traced her shod horse to the town, who knew that she had sat some hours in a dry wash over to the east before she went to town, and who followed her step by step back along the circling way which had taken her to that certain spot where Sonya Savarin had looked last upon the desert's familiar face from the security of her saddle. And there Two Fingers stood with Hosteen Nez, holding her lost hat.

The three men looked at each other. nodded, spoke a few low words.

They all saw, too, three long strange marks in the sand—wheel marks soft and wide with indentations in them, a sharply defined mark running between them, beginning a bit before their start, ending a bit before they

None of the three had ever seen an airplane closer than the high blue sky above, but they spoke of one now, considering. And they took the sombrero with them, jogging back to their hogans.

Tomorrow they would meet again, these three, and circle wider, asking all others of their tribe they met what they knew of sky ships, telling this which they knew. And only thesethe humble ones whom Rodney Blake despised-knew anything of Sonya Savarin and what had become of her.

CHAPTER XII

The Leopard Changes Spots.

Dawn came slowly to the deepwalled room where Sonya sat by the window. The girl was weary from her sleepless vigil. There were dark circles under her eyes, lines in her young face.

But her lips were steady and courageous, her heart the same. Today was to be big with portent: that she knew.

Perhaps it meant death. Perhaps she would never again behold the sunrise, or see the stars wheel in the

though she could have wished a more gentle end than would likely come to anyone, who fell under El Diablo's displeasure. And that she was there she knew full well; also why. Starr Stone had risked his life each time he saw her when he overstayed his time. Starr Stone who was, who must be, that Number Fifteen, Keenthai-how soft the numeral was in the Spanish-who was El Diablo's ablest lieutenant. The man whom he could neither spare nor wholly trust, now, since he had disobeyed him for a woman.

And those who disobeyed Diablo-Sonya Jerked her shoulders up, wet her lips that were dry as ashes.

Twice, they said, had the bandit leader "spread him up," only to take him down again. Starr Stone of the laughing courage who had dared all things in the old days, whose clever brain had been invaluable to El Capitan, who was too valuable to kill, yet who knew too much to live if he did not live for him.

And Sonya Savarin, who knew too much also: who loved Starr Stone and had listened to him in the dusk of many moons; who had stooped and picked up a five-tael can of first-grade opium when a bungling hand had dropped it.

Parks-Quatro, Number Four,-the bland keeper of a store on the crosscontinent railroad. He had blundered, but he had retrieved his blunder instantly by sending El Diablo's henchmen to destroy the evidence by taking it away-herself that evidence.

Well, once again, one could finish up but once, and she was no one's quitter. If only she might see Starr

He Sneered.

Stone again, look deep in his blue eves renew that soul's covenant which they had made one starlit dusk.

But the senora was here with food on a tray and she was kind and gentle with that tenderness we show to those about to go on long and perilous

"Eef eet please the Senorita," she said apologetically, "there ees one who would speak weeth you today. Eet ees one whose word ees the law, the

master." "I know," said Sonya, nodding her black head. "I shall be ready, senora.

At what hour?" "I do not know-only that when eet arrive one must be ready."

"Very well," said Sonya, and the woman went away. Deliberately she drank the coffee,

ate the spiced omelette, the little round bits of some hot sweet bread.

And a little later the senora came

She walked down the long dark passage, cool with the night's freshness, and into the great main room of the casa. Here there were many men and a few women, who all seemed waiting to look at her, which they did with thoroughness, in silence. A hard lot they were, for the most part, dark people burned by a tropic sun, their faces reflecting the hazards of the lives they led. There were men here who had burned and raided and shot, who thought no more of killing a human being than of slaughtering a sheep; women who followed them and wore the things they looted. Their eyes were hot and cold at the same time, if one might so describe them, flaming with all the varied lusts of lawless folk, devoid of mercy or com-

The senora passed before them and out at the door which stood open at the south, Sonya following close behind her with her head up. Here in the stone flagged yard sat her judge.

El Capitan Diablo, in a huge chair, behind a long table made of crude slabs and undressed wood set on sections of saplings peeled and weath ered. Here too was Manuel, that dapper slim pilot who had brought her across the Border. Manuel, second in power, in value, in ability, to that one whom the master had brought home to answer for his sins.

The sins of lingering too long about that master's business, of doing his bidding less and less eagerly, of that most heinous crime of all, loving a

El Diablo hated a good woman. Of all things on the earth he feared and hated most a good woman. What power this one might hold against him, what secrets she might know for his undoing, he did not know. What Quince had told her in the softening

no one. other living knew them; the woman pedition. of another world who might wreak his ruin if she chose.

That great structure of blood and raid and contraband which he had the bathysphere to 2,510 feet. Their built for himself from Mazatlan to prior record was 2,200 feet. In this New York city stood toppling in the dive, Doctor Beebe reported by telehands of these two-and El Diablo phone that he saw scores of fish new would not have it.

He looked at the slim girl before him, his thick nostrils dilating. "So," he said, "we meet again,

senorita." "So it would seem," said Sonya Savarin.

A great concourse of people was gathering swiftly in the grove, all standing back at a respectful distance. It was El Diablo's habit to have his judgments witnessed-for their moral

But nowhere was there a tall man with bronze hair and wild blue eyes that shone. The girl looked earnestly around, and El Diablo smiled.

"Not just yet, senorita," he said, "presently. In all good time."

Manuel rose and coming around the table, brought a chair and placed it for her. Sonva nodded but did not sit down. It seemed to her that she was on trial here, as indeed she was, though with the issue a foregone conclusion, and she must take it standing. The injustice, the insult of it all was making a fire in her soul, and she was

"I think, sir," she said sharply, suddenly, "that you will answer to my people and my country for this abduction of myself. You cannot hide it

"So? You think not? Well, well,

has El Diablo lost his cunning?" He had changed his speech to Spanish, and for a moment Sonya hesitated as to whether or not she should show she understood. Then she decided that he probably knew she did and accepted the issue.

"There comes an end to all things, senor," she said.

"Yes, to life even," the bandit said moothly, looking at her.

"To life, even," said Sonya calmly. A little whisper of admiration murmured through the silent crowd. She had courage, the young white woman from beyond the Border. No one had ever met the master so, word for word and eye for eye. The grim shadow of his judgments had always broken down his victims early. This girl stood tall and straight, her hands on the chair back.

"You remember, senorita." El Diablo said, "that once I took my lieutenant from your arms on a dance floor. That should have seen a warning. A sufficient warning. Yet you did not heed it."

"Why should I have heeded it?" said Sonya steadily. "Who were you that I should fear you to such an extent? In my country men are free-to dance with whom they choose."

"You saw that Quince feared me." "Yes. And knew there must be a reason. He is no man's coward"

"Then you should have known the eason to be good."

"I did." "And tried to find that reason out, have no doubt?"

"Assuredly." "And did?"

"No, senor, though I tried hard."

"You shield the man."

"You lie to me, senorita!" The man straightened in his chair, banged the heavy table with an iron

"And so do you!" flashed Sonya. "Carramba!" swore Diablo. "You tell me that?"

"You told me that. In my country man does not speak so to women." The man who ruled his little world with blood and steel half rose, his dark face purple with a mounting rage. In that wavering second Sonya Savarin was nearer death than she

had even been. Then he sat down again and smiled. That smile was deadly as an adder's

"So," he said, "we shall proceed. And Quince did not tell you that I meet the ships from China at Mazatlan?

"Nor that I bring into Mexico and along the Border merchandise of great value?" "No. senor."

"Nor that that merchandise crosses into the United States by my little gray ships of the sky to be sent to New York on the railroad?" "No senor."

"You are well schooled, senorita," he sneered. "I make bold to compliment you both. You did not know that Quince is-or was-my ablest man in both countries? That he knows as much of El Diablo as El Diablo knows about himself? That he can do anything connected with-my businessfrom seining the sea at low tide for floats tied to sunken contraband, to flying a plane? You did not know all

TO BE CONTINUED.

Fish New to Science Studied by Observers.

Washington.—Throngs of tourists lined the cliffs along St. Georges harurge of love he furiously suspected. bor, Bermuda, as Dr. William Reebe Evil himself, lost to all standards of and Otis Barton, intrepid deep-sea loyalty, a double-crosser of double divers, steamed out to sea, there to crossers, he trusted no one, believed in climb into their steel ball, the bathysphere, and be lowered to record And now he had the whole thing in depths in the Atlantic off Nonsuch his hands, thanks to Quatro: the man island, according to the National who knew his ways and works as none Geographic society, sponsor of the ex-

Already the holders of the record deep-sea dive, Doctor Beebe and his companion, in their first attempt, took to science. He dictated to his secretary above, thousands of words of description about little known denizens of "a world as strange to Mars." Barton, with the aid of a special, highpowered light, took motion pictures of weird creatures that floated and swam by the thick quartz eyes of the bathysphere.

After an hour at the record depth, during which Doctor Beebe reported the searchlight showed many new forms of life while other creatures could be observed owing to lights they carried on their bodies, the order to haul up was given.

Depths Rich in Fish Life. Upon emerging, Doctor Beebe said 'I have never seen so much material in my life, and new material, too. Much of it is entirely different from that which we observed during previous dives. It is the silliest thing in the world to attempt to describe in a few words, but we saw more fish and larger fish than during any other dive. Every dive convinces me of the futility of trying to get the true idea of deepsea life through dragging nets. Many deep-sea creatures are such rapid swimmers that they can easily get away from nets. One of the most amazing finds of the day was a fleshcolored fish which I observed at the 2,500-foot level. We observed schools of rare lampanyctus, silver hatchet fish, and thousands of tiny squid." The latest dive, at approximately

the same spot as the former record dive, was to 3,028 feet. The bathysphere remained at that level for only five minutes—sufficient time, however, to make possible interesting scientific observations which were dictated by telephone to a stenographer on the barge from which the heavy ball was lowered.___

Doctor Beebe reported that the pres sure at the maximum depth was more than 1,300 pounds to the square inch, but the bathysphere, used successfully on many previous deep-sea dives, showed no leakage. It took 2 hours and 46 minutes to make the dive, 2

hours and 41 minutes of which were spent in descending and ascending. The American flag and the flag of the National Geographic society were car-

ried on the cable above the sphere. As in the former dive, fish and other forms of undersea life, some recognized on the previous dive, and others that were new even to Doctor Beebe and Mr. Barton, flashed into their vision as they peered through the bathysphere windows. In this dark region, nature has provided many of its creatures with lights which glitter around their bodies. Whether these lights are for illumination for the purpose of finding food or attracting mates, is a problem which Doctor Beebe hopes to solve during his div-

ing expeditions. At 2,750 feet, Doctor Beebe glimpsed 'an amazingly large fish" which was about 20 feet long. He said this is probably the largest living thing ever seen in the deep sea. The movements of the huge mass of flesh, he reported. could be followed in the blackness by the luminescence of the thousands of small creatures it disturbed. Fishes and other creatures in the zone near the half-mile depth, the naturalist believes, are larger, more numerous, and more brightly illuminated, than in the shallower regions.

Some Fish Carry Lights. The bathysphere, which bears the name of the National Geographic so-

ciety and the New York Zoological so-

Woman Catches an Eight-Pound Fish

Boston.-It took Mrs. Grace Sherman of Quincy to show fishermen in Boston harbor how to fish. With a tiny line and a small hook Mrs. Sherman caught the largest fish taken off Boston light in years, an 8-pound cod. It required more than half an hour of fighting before it could be brought near enough to

ciety, is a steel ball 41/2 feet in diameter, with a shell 11/2 inches thick. It is too small to permit the two explorers to stand erect. Despite their close quarters, they were able to take photographs, and operate searchlights and motion picture cameras. Also inside the bathysphere was apparatus for purifying the air.

While one of the objects of the expedition was to go down a half-mile, it was not solely record depth that Doctor Beebe sought. Before, between, and since the two record dives, he and his aides have made many dives to observe sea life at various depths. During one dive with only a helmet, in only 40 feet of water, Doctor Beebe had just shot a sharp-nosed puffer when a 5-foot shark swooped down on the stunned fish. Doctor Beebe fought off the shark with the iron handle of a net he held in his hand, and obtained his specimen. Later the same day, he was interrupted in his observations by sharks, barracuda and a green moray eel, but none attacked him. On these shallow dives he collected excellent specimens of beautifully and weirdly colored fish.

Adolph Menjou and His New Wife

Adolph Menjou, film star, and Verree Teasdale, actress, were married in Los Angeles by Judge James H. Pope. Menjou was recently divorced by

Alfonso Rejects Reconciliation With Son | Thief's Ears Amputated

Break Caused by Ex-Prince's Wedding to Commoner.

Paris.—The latest attempt to bring about a reconciliation of former King Alfonso of Spain and his eldest son, the former prince of Asturias, has re-

sulted in a total failure. The young prince, who became estranged from his family a year ago when he married Senorita Sampedra Ocejo, decided recently that he could do more for himself than any would-be peacemakers, and, taking his wife. went to Fontainebleau, the little town outside of Paris where the exiled royal family had made its headquar-

The prince selected as an auspicious occasion the twenty-first birthday celebration of his younger brother, Don Juan. The former king and queer were busy arranging the birthday fes-

The young prince, who abdicated his rights to the throne and is now known as the Count Cavadonga, took his wife by the arm, swept by the servants

French Leaving Their

Farms for Life in City Paris.—French farmers are increasingly shaking the dust from their feet and polishing their shoes in the

The abandonment of the land, cherished by its owners as nowhere else in the world, has begun to arouse

grave concern in France. The value of land has sunk here since 1913 30, 40 and 60 per cent, depending on whether it is vineyard, forest or pasturage. Sale prices are based on what can be coaxed from the land in the way of revenue. This is so little that farmers no longer buy much and commerce is feeling the ef

Unable to make a living, farmers, called often the "backbone of France," are abandoning the land. The rural population, which was 75 per cent of the whole 50 years ago, is now only 50 per cent of the total population. Since 1913, 1,465,000 acres have been taken out of cultivation. In the last ten years, according to official figures. 8.000 farms have been abandoned and are now no longer worked.

Others are being worked by foreigners, mostly Italians. For military reasons, apparently, figures have not been made available since 1927, when foreigners were working 324,000 acres and were owners of 150,000.

and marched boldly into the house. Expecting to meet his father face to face, he was badly disappointed. Alfonso disappeared into his private apartments and declined to come out. The prince succeeded, however, in seeing his mother and brother.

Some months ago when the prince was ill in a Paris hotel, rumors went out that he was in a critical condition. The former queen heard the reports and motored in from Fontainebleau. A reconciliation took place between mother and son. Despite his son's ill-

ness, Alfonso remained adamant. Since the marriage of the former prince of Asturias to a commoner, Don Juan, third son of the royal family, is now heir to the throne of Spain, or at least whatever hopes the Bourbons have of regaining that throne. A few weeks ago Europe was buzzing with rumors that Don Juan was to be invested with the titular rank of king, but Alfonso promptly disclaimed any intention of relinquishing his rights.

SHOWS HIS SOUVENIRS

Midshipman Edwin Denby got home to Annapolis, with 800 or so of his buddies, from a summer cruise in European waters, and he is seen here showing his mother, Mrs. Edwin Denby, some of the souvenirs he picked up on the trip. Middy Denby's father was once secretary of the navy.

as 1784 Court Penalty

Sunbury, Pa.-Old records at the Northumberland county courthouse attest to the severity of sentences imposed by the courts during the Republic's infancy. The case of Joe Disberry versus organized society indicates severe sentences were then as

now, not infallible in curbing crime. Joe was the terror of the county, albeit he had a well-defined sense of humor. He wasn't particular about what he stole, but his favorite theft was food, cooked by himself in houses while the occupants were gone.

Finally the patience of authorities was exhausted. This sentence was imposed in September, 1784: "That the said Joseph Disberry receive thirtynine lashes between the hours of 8 and 9 o'clock tomorrow; to stand in the pillory one hour: to have his ears cut off and nailed to the post; to return the property stolen, or the value thereof: remain in prison three months: pay a fine, etc."

Col. Henry Antes, sheriff, saw that the provisions of the sentence were

executed. Court records show that he was convicted four years later of robbing three houses, and sentenced to the

penitentiary at Philadelphia. A few years later he returned to Sunbury, still sticky fingered. While robbing a mill in Union county he fell through a hatchway and suffered fatal
