

City of Lakeport Municipal Sewer District (CLMSD) Draft Sewer Use & Pretreatment Ordinance

Lakeport City Hall Wednesday November 21 from 2-4 pm

<http://www.cityoflakeport.com>

The City of Lakeport Municipal Sewer District has a Sewer Use & Pretreatment Ordinance that is in draft form. Find out why this is a necessary change and how it may impact you as a customer of the CLMSD.

Discussion topics will include:

Fats, Oils & Grease (FOG) Program

Wastewater Pretreatment Requirements for Food Service Facilities and other commercial facilities that discharge FOG into their wastewater flow. All new and existing facilities that generate and discharge FOG into their wastewater flow shall install, operate and maintain a FOG pretreatment system.

Private Sewer Lateral Inspection/Replacement Program

The minimum standards to which sewer laterals will be repaired, replaced, or re-lined for the purpose of obtaining a Sewer Lateral Certificate of Compliance. The CLMSD requires the cleaning, inspection and testing of sewer laterals connected to public sewers and serving residential, multi-family residential, commercial and industrial use properties upon the occurrence of stipulated property transfer, transactions or events.

User Classification & Wastewater Discharge Permits

CLMSD customers who are subject to National Categorical Pretreatment Standards, and/or who are classified as non-domestic Industrial Users may be subject to Wastewater Discharge Permit requirements in the future. Including but not limited to, analytical laboratories, dry cleaners, vehicle maintenance facilities, printing shops, printing allied agencies, photo processors, pesticide formulators/applicators, dental offices,
