Not much update on the turf or locker room projects at this time. We are actively going over plans and value-engineering the projects. The district mechanical department has set Spring Break to be completely out of the maintenance building next to Serpentine Stadium. This will allow the final analysis of utility's location to be done in the planning of the locker room project. And finally, a faculty member has offered to volunteer his time and form a High School fishing club starting this Spring. A survey sent out to students resulted in 75 replies from students who wish to participate.
