Demographics

Current population demographics and changes in demographic composition over time play a determining role in the types of health and social services needed by communities.

Total Population

A total of 51,025 people live in the 758.59 square mile report area defined for this assessment according to the U.S. Census Bureau American Community Survey 2015-19 5-year estimates. The population density for this area, estimated at 67.26 persons per square mile, is less than the national average population density of 91.93 persons per square mile.

Report Area	Total Population	Total Land Area (Square Miles)	Population Density (Per Square Mile)
Ogle County, IL	51,025	758.59	67.26
Illinois	12,770,631	55,517.13	230.03
United States	324,697,795	3,532,068.58	91.93

Population Under Age 18

Of the estimated 51,025 total population in the report area, an estimated 11,560 persons are under the age of 18, representing 22.66% of the population. These data are based on the latest U.S. Census Bureau American Community Survey 5-year estimates. The number of persons under age 18 is relevant because this population has unique needs which should be considered separately from other age groups.

Report Area	Total Population	Population Age 0-17	Population Age 0-17, Percent

Foreign-Born Population

This indicator reports the percentage of the population that is foreign-born. The foreign-born population includes anyone who was not a U.S. citizen or a U.S. national at birth. This includes any non-citizens, as well as persons born outside of the U.S. who have become naturalized citizens. The native U.S. population includes any person born in the United States, Puerto Rico, a U.S. Island Area (such as Guam), or abroad of American (U.S. citizen) parent or parents. The latest figures from the U.S. Census Bureau show that 2,202 persons in the report area are of foreign birth, which represents 4.32% of the report area population. This percentage is less than the national average of 13.55%.

Report Area	Total Population	Naturalized U.S. Citizens	Population Without U.S. Citizenship	Total Foreign-Birth Population	Foreign-Birth Population, Percent of Total Population
Ogle County, IL	51,025	859	1,343	2,202	4.32%

Veteran Population by Age Group, Percent

This indicator reports the percentage of veterans in the report area by age group.

Report Area	Age 18-34	Age 35-54	Age 55-64	Age 65-74	Age 75+
Ogle County, IL	1.70%	6.38%	7.43%	17.36%	23.21%
Illinois	1.52%	3.76%	5.47%	14.54%	17.89%
United States	2.15%	5.17%	7.79%	16.29%	20.13%

Income and Economics

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community’s ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

Employment - Labor Force Participation Rate

The table below displays the labor force participation rate for the report area. According to the 2014 – 2019 American Community Survey, of the 40,885 working age population, 26,578 are included in the labor force. The labor force participation rate is 65.01%.

Report Area	Total Population Age 16+	Labor Force	Labor Force Participation Rate
Ogle County, IL	40,885	26,578	65.01%
Illinois	10,215,498	6,645,843	65.06%
United States	259,662,880	163,555,585	62.99%

Employment - Unemployment Rate

Total unemployment in the report area for the current month equals 1,641, or 7.0% of the civilian non-institutionalized population age 16 and older (non-seasonally adjusted). This indicator is relevant because unemployment creates financial instability and barriers to access including insurance coverage, health services, healthy food, and other necessities that contribute to poor health status.

Income - Inequality (GINI Index)

This indicator reports income inequality using the Gini coefficient. Gini index values range between zero and one. A value of one indicates perfect inequality where only one house-hold has any income. A value of zero indicates perfect equality, where all households have equal income.

Index values are acquired from the 2015-19 American Community Survey and are not available for custom report areas or multi-county areas.

Income - Median Household Income

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income. There are 21,021 households in the report area, with an average income of \$75,899 and median income of \$60,986.

Report Area	Total Households	Average Household Income	Median Household Income
Ogle County, IL	21,021	\$75,899	\$60,986
Illinois	4,846,134	\$92,395	\$65,886

Poverty - Children Eligible for Free/Reduced Price Lunch

Free or reduced price lunches are served to qualifying students in families with income between under 185 percent (reduced price) or under 130% (free lunch) of the US federal poverty threshold as part of the federal National School Lunch Program (NSLP).

Out of 8,734 total public school students in the report area, 2,426 were eligible for the free or reduced price lunch program in the latest report year. This represents 27.8% of public school students, which is lower than the state average of 48.7%.

Report Area	Total Students	Students Eligible for Free or Reduced Price Lunch	Students Eligible for Free or Reduced Price Lunch, Percent
Ogle County, IL	8,734	2,426	27.8%

Education

This category contains indicators that describe the education system and the educational outcomes of report area populations. Education metrics can be used to describe variation in population access, proficiency, and attainment throughout the education system, from access to pre-kindergarten through advanced degree attainment. These indicators are important because education is closely tied to health outcomes and economic opportunity.

Access - Preschool Enrollment (Age 3-4)

This indicator reports the percentage of the population age 3-4 that is enrolled in school. This indicator helps identify places where pre-school opportunities are either abundant or lacking in the educational system.

Report Area	Population Age 3-4	Population Age 3-4 Enrolled in School	Population Age 3-4 Enrolled in School, Percent

Attainment - High School Graduation Rate

The adjusted cohort graduation rate (ACGR) is a graduation metric that follows a "cohort" of first-time 9th graders in a particular school year, and adjust this number by adding any students who transfer into the cohort after 9th grade and subtracting any students who transfer out, emigrate to another country, or pass away. The ACGR is the percentage of the students in this cohort who graduate within four years. In the report area, the adjusted cohort graduation rate was 94.0% during the most recently reported school year. Students in the report area performed better than the state, which had an ACGR of 84.8%.

Report Area	Adjusted Student Cohort	Number of Diplomas Issued	Cohort Graduation Rate
Ogle County, IL	468	440	94.0%
Illinois	90,008	76,312	84.8%
United States	3,180,487	2,778,988	87.4%

On-Time Graduation, Rate by School District (Secondary), ED Facts 2017-18

High School Graduation Rate by Student Race and Ethnicity

The table and chart below display local, state, and national variation in cohort graduation rates by student race and ethnicity. *Note: Data are suppressed for some school districts for population groups when the "universe" population falls below a certain threshold. County, state, and national summaries are aggregates of district level data and may not represent all students when suppression has occurred.*

Report Area	Non-Hispanic White	Black or African American	Hispanic or Latino
Ogle County, IL	91.1%	No data	73.5%
Illinois	91.0%	75.0%	79.7%
United States	90.5%	81.6%	83.0%

High School Graduation Rate by Year, 2012-13 through 2017-18

The table below shows local, state, and national trends in cohort graduation rates. *Note: Data for some states are omitted each year when they fail to meet federal reporting standards or deadlines. Use caution when comparing national trends as the "universe" population may differ over time.*

Report Area	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18
Ogle County, IL	94.2%	90.0%	91.0%	91.2%	93.0%	94.0%
Illinois	80.4%	84.5%	83.4%	82.7%	85.7%	84.8%
United States	83.2%	84.3%	84.3%	86.1%	86.8%	87.4%

Attainment - No High School Diploma

Within the report area there are 3,475 persons aged 25 and older without a high school diploma (or equivalency) or higher. This represents 9.77% of the total population aged 25 and older. This indicator is relevant because educational attainment is linked to positive health outcomes (Freudenberg & Ruglis, 2007).

Report Area	Total Population Age 25+	Population Age 25+ with No High School Diploma	Population Age 25+ with No High School Diploma, Percent
Ogle County, IL	35,569	3,475	9.77%

Attainment - Overview

Educational Attainment shows the distribution of the highest level of education achieved in the report area, and helps schools and businesses to understand the needs of adults, whether it be workforce training or the ability to develop science, technology, engineering, and mathematics opportunities. Educational attainment is calculated for persons over 25, and is an estimated average for the period from 2014 to 2019.

For the selected area, 14.3% have at least a college bachelor’s degree, while 33.4% stopped their formal educational attainment after high school.

Report Area	No High School Diploma	High School Only	Some College	Associates Degree	Bachelors Degree	Graduate or Professional Degree

Attainment – Overview

Ogle County, IL

Housing and Families

This category contains indicators that describe the structure of housing and families, and the condition and quality of housing units and residential neighborhoods. These indicators are important because housing issues like overcrowding and affordability have been linked to multiple health outcomes, including infectious disease, injuries, and mental disorders. Furthermore, housing metrics like home-ownership rates and housing prices are key for economic analysis.

Households - Overview

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption*. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

*Family households and married-couple families do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.

Report Area	Total Households	Family Households	Family Households, Percent	Non-Family Households	Non-Family Households, Percent

Evictions

This indicator reports information about formal evictions based on court records from 48 states and the District of Columbia, compiled by the Eviction Lab. The number evictions and eviction filings within the report area is shown in below. The “filing rate” is the ratio of the number of evictions filed in an area over the number of renter-occupied homes in that area. An “eviction rate” is the subset of those homes that received an eviction judgment in which renters were ordered to leave. For

the year 2016, the Eviction Lab reports that, of 5,353 homes in the report area, there were 129 eviction filings, for an eviction filing rate of 2.41%. 88 of the eviction filings ended in an eviction, for an eviction rate of 1.64%.

Note: Not all counties have data that has been provided. Indicator data do not include information about "informal evictions", or those that happen outside of the courtroom.

Report Area	Renter Occupied Households	Eviction Filings	Evictions	Eviction Filing Rate	Eviction Rate

Housing Costs - Cost Burden (30%)

This indicator reports the percentage of the households where housing costs are 30% or more of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels. Of the 21,021 total households in the report area, 4,635 or 22.05% of the population live in cost burdened households.

Report Area	Total Households	Cost Burdened Households (Housing Costs Exceed 30% of Income)	Cost Burdened Households, Percent
Ogle County, IL	21,021	4,635	22.05%
Illinois	4,846,134	1,468,277	30.30%

Cost Burdened Households by Tenure, Total

These data show the number of households that spend more than 30% of the household income on housing costs. In the report area, there were 4,635 cost burdened households according to the U.S. Census Bureau American Community Survey (ACS) 2014-2019 5-year estimates. The data for this indicator is only reported for households where household housing costs and income earned was identified in the American Community Survey.

Report Area	Cost Burdened Households	Cost Burdened Rental Households	Cost Burdened Owner Occupied Households (With Mortgage)	Cost Burdened Owner Occupied Households (With No Mortgage)
Ogle County, IL	4,635	1,860	2,215	560

Housing Quality - Substandard Housing

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%. Selected conditions provide information in assessing the quality of the

housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard. Of the 21,021 total occupied housing units in the report area, 4,794 or 22.81% have one or more substandard conditions.

Report Area	Total Occupied Housing Units	Occupied Housing Units with One or More Substandard Conditions	Occupied Housing Units with One or More Substandard Conditions, Percent
Ogle County, IL	21,021	4,794	22.81%

Substandard Housing: Number of Substandard Conditions Present

Ogle County, IL

Substandard Housing: Households Lacking Complete Plumbing Facilities

Complete plumbing facilities include: (a) hot and cold running water, (b) a flush toilet, and (c) a bathtub or shower. All three facilities must be located inside the house, apartment, or mobile home, but not necessarily in the same room. Housing units are classified as lacking complete plumbing facilities when any of the three facilities is not present.

Report Area	Occupied Housing Units	Housing Units Lacking Complete Plumbing Facilities	Housing Units Lacking Complete Plumbing Facilities, Percent
Ogle County, IL	21,021	47	0.22%
Illinois	4,846,134	13,255	0.27%
United States	120,756,048	468,497	0.39%

Substandard Housing: Households Lacking Complete Kitchen Facilities

A unit has complete kitchen facilities when it has all three of the following facilities: (a) a sink with a faucet, (b) a stove or range, and (c) a refrigerator. All kitchen facilities must be located in the house, apartment, or mobile home, but they need not be in the same room. A housing unit having only a microwave or portable heating equipment such as a hot plate or camping stove should not be considered as having complete kitchen facilities. An icebox is not considered to be a refrigerator.

Report Area	Occupied Housing Units	Housing Units Lacking Complete Kitchen Facilities	Housing Units Lacking Complete Kitchen Facilities, Percent
Ogle County, IL	22,663	270	1.19%
Illinois	5,360,315	158,188	2.95%
United States	137,428,986	3,840,988	2.79%

Substandard Housing: Households Lacking Telephone Service

A telephone must be in working order and service available in the house, apartment, or mobile home that allows the

respondent to both make and receive calls. Households that have cell-phones (no land-line) are counted as having telephone service available. Households whose service has been discontinued for nonpayment or other reasons are not counted as having telephone service available.

Report Area	Housing Units Lacking Telephone Service	Housing Units Lacking Telephone Service	Owner-Occupied Units Lacking Telephone Service	Owner-Occupied Units Lacking Telephone Service	Renter-Occupied Units Lacking Telephone Service	Renter-Occupied Units Lacking Telephone Service

United States	2,317,813	1.92%	987,063	1.28%	1,330,750	3.06%

Housing Stock - Age

This indicator reports, for a given geographic area, the median year in which all housing units (vacant and occupied) were first constructed. The year the structure was built provides information on the age of housing units. These data help identify new housing construction and measures the disappearance of old housing from the inventory, when used in combination with data from previous years. This data also serves to aid in the development of formulas to determine substandard housing and provide assistance in forecasting future services, such as energy consumption and fire protection. There are a total 22,663 housing units in the report area, and the median year built is 1970.

Report Area	Total Housing Units	Median Year Structures Built
Ogle County, IL	22,663	1970
Illinois	5,360,315	1968

Other Social & Economic Factors

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community’s ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

Area Deprivation Index

This indicator reports the average (population weighted) Area Deprivation Index (ADI) for the selected area. The ADI is a

metric used to rank neighborhoods by socioeconomic status disadvantage in a region of interest (e.g. at the state or national level). ADI scores range from 1 to 100, with 1 representing the least disadvantaged areas.

Insurance - Uninsured Population (ACS)

The lack of health insurance is considered a *key driver* of health status.

In the report area 4.67% of the total civilian non-institutionalized population are without health insurance coverage. The rate of uninsured persons in the report area is less than the state average of 6.83%. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

Report Area	Total Population (For Whom Insurance Status is Determined)	Uninsured Population	Uninsured Population, Percent

Social Vulnerability Index

The degree to which a community exhibits certain social conditions, including high poverty, low percentage of vehicle access, or crowded households, may affect that community's ability to prevent human suffering and financial loss in the event of disaster. These factors describe a community's social vulnerability.

The social vulnerability index is a measure of the degree of social vulnerability in counties and neighborhoods across the United States, where a higher score indicates higher vulnerability. The report area has a social vulnerability index score of 0.29, which is less than the state average of 0.49.

Report Area	Total Population	Socioeconomic Theme Score	Household Composition Theme Score	Minority Status Theme Score	Housing & Transportation Theme Score	Social Vulnerability Index Score
Ogle County, IL	51,328	0.30	0.36	0.64	0.19	0.29

Voter Participation Rate

This indicator reports the percentage of the adult population that voted in the national elections on November 2, 2020. Results are preliminary as of December 14, 2020. Voter participation rates are calculated as a percentage of the voting age population (age 18+) and not as a percentage of registered voters. In the 2020 election, of the report area's 38,140 voting age population, 26,340 or 69.1% have cast a vote.

Report Area	Total Citizens Age 18+	Total Votes Cast	Voter Participation Rate
Ogle County, IL	38,140	26,340	69.1%
Illinois	9,049,960	6,038,850	66.7%
United States	230,428,731	158,433,557	68.8%

Physical Environment

A community's health also is affected by the physical environment. A safe, clean environment that provides access to healthy food and recreational opportunities is important to maintaining and improving community health.

Air & Water Quality - Particulate Matter 2.5

This indicator reports the percentage of days with particulate matter 2.5 levels above the National Ambient Air Quality Standard (35 micrograms per cubic meter) per year, calculated using data collected by monitoring stations and modeled to include counties where no monitoring stations occur. This indicator is relevant because poor air quality contributes to respiratory issues and overall poor health.

Report Area	Total Population (2010)	Average Daily Ambient Particulate Matter 2.5	Days Exceeding Emissions Standards	Days Exceeding Standards, Percent (Crude)	Days Exceeding Standards, Percent (Weighted)

Climate & Health - Drought Severity

Drought is defined as a moisture deficit bad enough to have social, environmental or economic effects. The Drought Monitor map identifies areas of drought and labels them by intensity¹. D1 is the least intense level and D4 the most intense. In the report area, 0.00% of weeks during the 2017-2019 period were spent in drought (any level). An additional 7.83% of weeks were categorized spent in "abnormally dry conditions" (D0) indicating that drought could occur, or that the area is recovering from drought but are not yet back to normal.

Report Area	Time Period	Weeks in D0 (Abnormally Dry), Percent	Weeks in D1 (Moderate Drought), Percent	Weeks in D2 (Severe Drought), Percent	Weeks in D3 (Extreme Drought), Percent	Weeks in D4 (Exceptional Drought), Percent	Weeks in Drought (Any), Percent

Food Environment - Fast Food Restaurants

This indicator reports the number of fast food restaurants per 10,000 population. The prevalence of fast food restaurants provides a measure of both access to healthy food and environmental influences on dietary behaviors. Fast food restaurants are defined as limited-service establishments primarily engaged in providing food services (except snack and nonalcoholic beverage bars) where patrons generally order or select items and pay before eating.

Food Environment - Grocery Stores

Healthy dietary behaviors are supported by access to healthy foods, and Grocery Stores are a major provider of these foods. There are 8 grocery establishments in the report area, a rate of 1.50 per 10,000 population. Grocery stores are defined as supermarkets and smaller grocery stores primarily engaged in retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Delicatessen-type establishments are also included. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores, are excluded.

Clinical Care and Prevention

A lack of access to care presents barriers to good health. Supply of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

Cancer Screening - Mammogram

This indicator reports the percentage of female Medicare beneficiaries age 35 and older who had a mammogram in most recent reporting year. The American Cancer Society recommends that women age 45 to 54 should get a mammogram every

year, and women age 55 and older should get a mammogram every other year. In the latest reporting period there were 7,486 Medicare beneficiaries in the report area, and 32% of female beneficiaries age 35 or older had a mammogram in the past year. The rate in the report area was lower than the state rate of 34% during the same time period.

Report Area	Medicare Beneficiaries	Female Beneficiaries with Recent Mammogram, Percent
Ogle County, IL	7,486	32%
Illinois	1,446,658	34%
United States	33,648,235	32%

Diabetes Management - Hemoglobin A1c Test

This indicator reports the percentage of diabetic Medicare patients who have had a hemoglobin A1c (hA1c) test, a blood test which measures blood sugar levels, administered by a health care professional in the past year. In the report area, 577 Medicare enrollees with diabetes have had an annual exam out of 665 Medicare enrollees in the report area with diabetes, or

86.8%. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Report Area	Total Medicare Enrollees	Medicare Enrollees with Diabetes	Medicare Enrollees with Diabetes with Annual Exam	Medicare Enrollees with Diabetes with Annual Exam, Percent
Ogle County, IL	5,700	665	577	86.8%

Hospitalizations - Preventable Conditions

This indicator reports the preventable hospitalization rate among Medicare beneficiaries for the latest reporting period.

Preventable hospitalizations include hospital admissions for one or more of the following conditions: diabetes with short-term complications, diabetes with long-term complications, uncontrolled diabetes without complications, diabetes with lower-extremity amputation, chronic obstructive pulmonary disease, asthma, hypertension, heart failure, bacterial pneumonia, or urinary tract infection. Rates are presented per 100,000 beneficiaries. In the latest reporting period there were 7,486 Medicare beneficiaries in the report area. The preventable hospitalization rate was 4,923. The rate in the report area was lower than the state rate of 5,081 during the same time period.

Report Area	Medicare Beneficiaries	Preventable Hospitalizations, Rate per 100,000 Beneficiaries

Illinois	4,928	8,284	4,717
United States	4,447	6,961	4,699

Health Behaviors

Health behaviors such as poor diet, a lack of exercise, and substance abuse contribute to poor health status.

Alcohol Consumption

In the report area, 20.18%, or 10,303 adults self-report excessive drinking in the last 30 days. Data for this indicator are based on survey responses to the 2015, 2016, and 2017 Behavioral Risk Factor Surveillance System (BRFSS) annual surveys. Excessive drinking is defined as the percentage of the population who report at least one binge drinking episode involving five or more drinks for men and four or more for women over the past 30 days, or heavy drinking involving more than two drinks per day for men and more than one per day for women, over the same time period. Alcohol use is a behavioral health issue that is also a risk factor for a number of negative health outcomes, including: physical injuries related to motor vehicle accidents, stroke, chronic diseases such as heart disease and cancer, and mental health conditions such as depression and suicide. There are a number of evidence-based interventions that may reduce excessive/binge drinking; examples include raising taxes on alcoholic beverages, restricting access to alcohol by limiting days and hours of retail sales, and screening and counseling for alcohol abuse (Centers for Disease Control and Prevention, Alcohol Use, 2016).

Report Area	Adult Population	Adults Reporting Excessive Drinking	Percentage of Adults Reporting Excessive Drinking
Ogle County, IL	51,063	10,303	20.18%
Illinois	12,802,023	2,745,344	21.44%

Physical Inactivity

Within the report area, 11,726 or 29.6% of adults aged 20 and older self-report no active leisure time, based on the question: "During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?" This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as obesity and poor cardiovascular health.

Infectious Diseases

Ogle County Health Departments works hard to contain communicable diseases for the safety of the community. These diseases can cause adverse health outcomes. The public health nurse works to investigate, contact trace, and protect against communicable diseases that occur in Ogle County. The role of the public health nurse is essential in preventing epidemics in the community.

The graph below are shows positive or probable cases that have occurred in Ogle County over the years 2015 to 2019. In 2016 there is an increase in cases of Campylobacteriosis to 26 positive cases from 0 the year before. The cases then decrease in the years following. Pertussis has a significant increase in 2019 to 49 positive cases. All other diseases either have small increases or maintain case numbers over the time frame.

The graph below shows comparison for each communicable disease. The blue represents the total number of cases. This includes probable cases, positive cases, and non-cases. The orange lines represent the number of positive or probable cases of each disease. Campylobacteriosis is tied for the highest communicable disease investigated but ultimately hold the most positive or probable cases at 73 cases. Lyme disease has an equal amount of investigated but has a small number of positive cases. Other notable communicable diseases happening in Ogle County are pertussis and salmonellosis. This chart also accounts for potential human exposures to rabies.

Health Outcomes

Measuring morbidity and mortality rates allows assessing linkages between social determinants of health and outcomes. By comparing, for example, the prevalence of certain chronic diseases to indicators in other categories (e.g., poor diet and exercise) with outcomes (e.g., high rates of obesity and diabetes), various causal relationship may emerge, allowing a better understanding of how certain community health needs may be addressed.

Cancer Incidence - All Sites

This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of cancer (all sites) adjusted to 2000 U.S. standard population age groups (Under age 1, 1-4, 5-9, ..., 80-84, 85 and older).

In the report area, there were 319 new cases of cancer reported, for an incidence rate of 477.1 per 100,000 people. Statewide, the incidence rate is 465.5 per 100,000 people.

Report Area	Estimated Total Population	New Cases (Annual Average)	Cancer Incidence Rate (Per 100,000 Pop.)

Mortality

This indicator reports that the five-year trend of death in Ogle County. The deaths are broken into graphs to show how death is affecting each demographic. The first graph is total population then the next few graphs have numbers broken down into gender, ethnicity, and age. Total deaths in Ogle County had a 71 count increase from 2019 to 2020 reaching above 600. Males are impacted by death at a higher rate than females except in 2020 where death in females surpass males by 31 deaths. The height in deaths of females in 2020 is 65 more deaths than the highest number in the past five years. Whites in Ogle County have a higher number of death this is due to the majority of the county being white. There has been an increase in death in minorities from 2019 to 2020. There was an increase of 103 deaths in the white population from 2016 to 2020. Death broken down into age shows that ages 65-84 are mostly impacted. Age groups of 85 and above and 45-64 are the two next highest in death. There has been an increase in deaths 65-84 and 85 and above in between 2016 and 2020 while age group 45-64 has seen a rise until 2019 and the numbers fall in 2020.

Total of Deaths in Ogle County 2016-2020

Total of Deaths	
Year	Total of Deaths
2016	500
2017	541
2018	517
2019	542
2020	613

Death by Gender in Ogle County 2016-2020

Death by Race/Ethnicity in Ogle County 2016-2020

Death by Age Group in Ogle County 2016-2020

Below are graphs to represent drug overdose deaths and other causes of death in Ogle County. Drug overdose deaths have seen a slight increase from 2018 to 2020. Cancer and heart disease are the highest reasons of death and in 2020 cancer deaths double in numbers from 121 in 2019 to 237 in 2020. Heart disease deaths stay in between 100 and 125 for the five-year time period. The third highest cause of death has changed from year to year and does not amount to half of the second leading cause.

Cause of Death in Ogle County										
Year	Heart Disease	Cancer	Stroke	Chronic Lower Respiratory Diseases	Accidents	Alzheimer's Disease	Diabetes	Kidney Disease	Influenza & Pneumonia	Septicemia
2016	101	124	35	46	26	17	5	7	6	6

Mortality - Cancer

This indicator reports the 2015-2019 five-year average rate of death due to malignant neoplasm (cancer) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummairized for report areas from county level data, only where data is available. This indicator is relevant because cancer is a leading cause of death in the United States.

In the report area, during 2015-2019 there were a total of 609 deaths due to cancer among the total population of 51,112. The age-adjusted death rate of 169.1 per every 100,000 people is greater than the state's reported rate of 158.7. This rate is greater than the Healthy People 2030 target of less than or equal to 122.7.

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Pop.)	Age-Adjusted Death Rate (Per 100,000 Pop.)
Ogle County, IL	51,112	609	238.3	169.1
Illinois	12,775,292	121,039	189.5	158.7
United States	325,134,494	2,991,951	184.0	152.3

Note: This indicator is compared to the state average.

Mortality - Lung Disease

This indicator reports the 2015-2019 five-year average rate of death due to chronic lower respiratory disease per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because lung disease is a leading cause of death in the United States.

In the report area, during 2015-2019 there were a total of 189 deaths due to chronic lower respiratory disease among the total population of 51,112. The age-adjusted death rate of 52.4 per every 100,000 people is greater than the state's reported rate of 36.9.

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Pop.)	Age-Adjusted Death Rate (Per 100,000 Pop.)
Ogle County, IL	51,112	189	74.0	52.4
Illinois	12,775,292	28,086	44.0	36.9
United States	325,134,494	786,303	48.4	40.2

Note: This indicator is compared to the state average.

Mortality - Motor Vehicle Crash

This indicator reports the 2015-2019 five-year average rate of death due to motor vehicle crash per 100,000 population, which include collisions with another motor vehicle, a nonmotorist, a fixed object, and a non-fixed object, an overturn, and any other non-collision. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. This indicator is relevant because motor vehicle crash deaths are preventable and they are a cause of premature death.

In the report area, during 2015-2019 there were a total of 31 deaths due to motor vehicle crash among the total population of 51,112. The age-adjusted death rate of 11.6 per every 100,000 people is greater than the state's reported rate of 8.5. This rate is greater than the Healthy People 2030 target of less than or equal to 10.1.

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Pop.)	Age-Adjusted Death Rate (Per 100,000 Pop.)
Ogle County, IL	51,112	31	12.1	11.6

Mortality - Premature Death

This indicator reports Years of Potential Life Lost (YPLL) before age 75 per 100,000 population for all causes of death, age-adjusted to the 2000 standard. YPLL measures premature death and is calculated by subtracting the age of death from the 75 year benchmark. This indicator is relevant because a measure of premature death can provide a unique and comprehensive look at overall health status.

In the report area, there were 662 premature deaths, leading to the loss of 9,802 potential years of life. The rate of years lost is 6,953 per every 100,000 people, which is greater than the state's loss rate of 6,698.

Report Area	Premature Deaths, 2016-2018	Years of Potential Life Lost, 2016-2018 Average	Years of Potential Life Lost, Rate per 100,000 Population
Ogle County, IL	662	9,802	6,953

Mortality - Stroke

This indicator reports the 2015-2019 five-year average rate of death due to cerebrovascular disease (stroke) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummairized for report areas from county level data, only where data is available. This indicator is relevant because stroke is a leading cause of death in the United States.

In the report area, during 2015-2019 there were a total of 166 deaths due to cerebrovascular disease (stroke) among the total population of 51,112. The age-adjusted death rate of 46.1 per every 100,000 people is greater than the Healthy People 2030 target of less than or equal to 33.4.

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Pop.)	Age-Adjusted Death Rate (Per 100,000 Pop.)

Mortality - Suicide

This indicator reports the 2015-2019 five-year average rate of death due to intentional self-harm (suicide) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because suicide is an indicator of poor mental health.

In the report area, during 2015-2019 there were a total of 33 deaths due to suicide among the total population of 51,112. The age-adjusted death rate of 12.9 per every 100,000 people is greater than the state's reported rate of 10.9. The age-adjusted death rate of 12.9 per every 100,000 people is greater than the Healthy People 2030 target of less than or equal to 12.8.

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Pop.)	Age-Adjusted Death Rate (Per 100,000 Pop.)

Special Topics - COVID-19

Indicators in this section are part of a series of rotating special topics. These indicators are publicly available to all users to help inform response to current events.

COVID-19 - Confirmed Cases

This indicator reports incidence rate of confirmed COVID-19 cases per 100,000 population. Data for this indicator are updated daily and derived from the Johns Hopkins University data feed.

In the report area, there have been 6,004 total confirmed cases of COVID-19. The rate of confirmed cases is 11,790.35 per 100,000 population, which is greater than the state average of 10,530.28. Data are current as of 5/4/2021 7:20:46 AM (CDT).

Report Area	Total Population	Total Confirmed Cases	Confirmed Cases, Rate per 100,000 Population	Last Update (CDT)
Ogle County, IL	50,923	6,004	11,790.35	5/4/2021 7:20:46 AM
Illinois	12,741,080	1,341,671	10,530.28	5/4/2021 7:20:46 AM
United States	326,262,499	32,006,226	9,809.96	5/4/2021 7:20:46 AM

Social Distancing - Mobility Reports (Google)

The table below displays data from the Google mobility reports. These reports show how visits and length of stay at different places change compared to a baseline. The baseline is the *median* value, for the corresponding day of the week, during the 5-week period Jan 3–Feb 6, 2020. Google prepared this report to help you and public health officials understand responses to social-distancing guidance related to COVID-19.

Within the report area, the number and length of visits to workplaces decreased by -21%, while trips to the grocery store or

pharmacy increased by 3%. This compares to the statewide totals of -32% trips to workplaces and -3% trips to grocery stores and pharmacies.

Report Area	Report Date	Retail and recreation	Grocery and pharmacy	Parks	Transit stations	Workplaces	Residential
Ogle County, IL	4/28/2021 12:00:00 AM	11%	3%	No data	No data	-21%	4%
Illinois	4/28/2021 12:00:00 AM	-11%	-3%	1%	-34%	-32%	10%
United States	4/28/2021 12:00:00 AM	-7%	-1%	26%	-27%	-29%	7%

COVID-19 Fully Vaccinated Adults

This indicator reports the percent of adults fully vaccinated for COVID-19. Data is updated daily from the CDC API. Vaccine hesitancy is the percent of the population estimated to be hesitant towards receiving a COVID-19 vaccine. The Vaccine Coverage Index is a score of how challenging vaccine rollout may be in some communities compared to others, with values ranging from 0 (least challenging) to 1 (most challenging).

Report Area	Percent of Adults Fully Vaccinated	Estimated Percent of Adults Hesitant About Receiving COVID-19 Vaccination	Vaccine Coverage Index
Ogle County, IL	18.5%	16%	0.35
Illinois	40.46%	14.41%	0.37
United States	40.73%	16.06%	0.43

Note: This indicator is compared to the state average.
