SCDOT asks for public input on Momentum 2050 plan through Multimodal Transportation Planning Survey

Columbia, SC (June , 2024) - The South Carolina Department of Transportation is looking for public input on the future of transportation in South Carolina through a multimodal transportation survey. Momentum 2050 is the statewide plan for the future of South Carolina's transportation network.

The South Carolina Department of Transportation (SCDOT) is looking at the best way to move people and goods across the state. In South Carolina, we face many changes. These shifts — in population, communities, businesses, environment, safety, and travel behavior — affect how people and goods move throughout the state. It is important we proactively plan to address these changes, so we can deliver a multimodal transportation system that maximizes the safety of people, the environment, and our economy.

That's why, every five years SCDOT updates the plan for the future of the state's multimodal transportation network. The document is a statewide plan for all users, all modes and any area that has a role in South Carolina's transportation system. It evaluates the status of the transportation system, what's changing, and how we're going to move forward over the next twenty-five years. This plan does not choose specific projects or decide what will be built where, but it develops the vision and goals for the future of transportation in South Carolina.

Secretary of Transportation, Justin Powell said, "This is a way for South Carolinians to get involved in the way we move people and goods across the state. We want to hear from you on the future of transportation in South Carolina."

About SCDOT

The South Carolina Department of Transportation (SCDOT) is the state agency with oversight of South Carolina's network of highways and bridges, including responsibilities such as planning, design, construction, financing, and roadway safety. To ensure the nation's fourth-largest highway system is prepared to serve the needs of South Carolina's growing economy and population, SCDOT has developed a Strategic 10-Year Plan that addresses improvements to the state's highway and bridge systems.
