Septic System Permit Application

For Office Use Only		
Application received by	Permit No	
Application must be filled in completely, inco	omplete applications will not be accepted	
Application Date	<del>-</del>	
Project Location		
Project Address		
Assessor's Parcel No		
Manufactured Home Park		_Space No
Applicant		
Name	Phone No	
Mailing Address		
City	State	Zip Code
Property Owner		
Name	Phone No	
Mailing Address		
City		Zip Code
Lot Size (acres or sq. ft.)	Use of system:	Construction will be done by:
Dimensions of Lot	Residential	☐ Applicant/Property owner
	☐ Commercial / Industrial	☐ Contractor
Number of bedrooms in dwelling	Number of people the septic s	ystem will serve
Distance from site to nearest waterway		
Distance from site to nearest public sewer s	ystem	
Name and phase of subdivision that propert	y is located in (if applicable)	
Are you required to install a denitrification se	eptic system? ☐ Yes ☐ No	
If yes, provide information for the maintenance	contractor below and attach a copy of your main	ntenance agreement to this application.
Denitrification septic system maintenance	ce contractor	
Name	Phone No.	
Mailing Address		

Septic Tank		
Manufacturer	Model	
Size		
	•	
Leach field	Normalia and a filipa and	Langeth of angle line
Distance from well(s)		<del>-</del>
Distance between lines (if applicable)		
Depth of trench before leach rock is added		
Amount of leach rock to be added under lea		0
Amount of leach rock to be added over lead	ch pipe	
Septic System Contractor		
		Phone No
Mailing Address		Zin Codo
		nse No
Provide information for all contractors involved w	vith the project. Please attach s	econd sheet with any additional contractors.
Water source of residence:  ☐ Private well ☐ Public water s ☐ Community well	system Name of system	
Well Information (if applicable)		
Diameter Dep	oth	Casing depth
	orsepower of pump motor _	
Well Driller Information		
	ı	Phone No.
Mailing Address		
		e Zip Code
Applicant Signature		
I hereby state that the information provided to comply will all applicable state laws and I		and true to the best of my knowledge. I agree and adopted codes.
x	Date	
	<del></del> -	<del></del>

Two sets of construction plans and one copy of site plan are required to be submitted with each application.

### Site Plan

A site plan is required to be submitted with each application. The site plan may be drawn on the following page. Nevada Administrative Code 444.784 requires the following items to be shown on the site plan:

- A. The title and date of the plan and the signature of the owner or representative.
- B. The direction of north clearly indicated.
- C. The scale to which the plan is drawn (i.e. 1 inch = 50 feet)
- D. The number of bedrooms in the single-family dwelling or, if the request for approval is for a commercial system, the calculations used by the engineer to determine the minimum capacity of the commercial system.
- E. The capacity of the septic tank.
- F. The dimensions of the lot.
- G. Each component of the individual sewage disposal system, which must be properly marked and located at specified distances.
- H. The depth, length, width and spacing of any absorption trenches.
- I. The maximum slope across the absorption system area.
- J. The location and depth of each proposed or actual well, including the depth of casing or surface grout seal.
- K. The distance of each well and soil absorption system to the property line.
- L. The location of the water supply lines, building sewer lines and other underground utilities.
- M. The location of the source of water to be used by the individual sewage disposal system, including wells, public water service connections or other approved sources.
- N. The location of each percolation test hole and boring test hole.
- O. The location of structures, paved areas, driveways, trees and patios.
- P. The location of the reserve absorption area, which must be of a size not less than the size of the primary absorption area.
- Q. The location and distance to any watercourses within 500 feet (i.e. ponds, rivers, streams). If there are no watercourses, the plot plan must so indicate.
- R. A map of the area in which the individual sewage disposal system will be located that shows the location of roads.
- S. The distance to any public sewer systems. If there are none, the site plan must so indicate.
- T. The location and distance to wells and sewage disposal systems on surrounding lots. If the lots are vacant, the plan must so indicate.

## **Additional Information**

Soil characteristics, depth to water table and bedrock, percolation test results and design specifications must accompany the site plan.

	Site Plan	
Name		
Date		
Scale		

# **Percolation Testing**

Two percolation tests are required for each absorption area. Follow the instructions attached to this application and enter the information in the tables below. The last reading is to be used to determine the percolation rate. Percolation rate is calculated by dividing the time interval by the water level drop.

Test hole no	Date of Test	Percolation test	performed by	
Location				
Depth of hole (inches)			nches)	
Number of hours that soil wa	as presoaked (if applicable	e)		
Presoak start time		Presoak end time		<u></u>
Percolation Test Data				
Time	Depth to water (inches)	Time Interval (minutes)	Water level drop (inches)	Percolation Rate: minutes per inch (min/inch)
Percolation Rate:	Min	utes/Inch		
Test hole no	Date of Test	Percolation test	performed by	
Location				
Depth of hole (inches)				
Number of hours that soil wa	as presoaked (if applicable			
Presoak start time		Presoak end time		<u>—</u>
Percolation Test Data			1	
Time	Depth to water (inches)	Time Interval (minutes)	Water level drop (inches)	Percolation Rate: minutes per inch (min/inch)
Percolation Rate:	Min	utes/Inch		

# **Soils Profile**

A minimum of two test pits must be excavated to a depth of at least 5 feet below the bottom of the proposed absorption trench. After excavation, observe the soils and fill in the information below.

Test hole no.	Date of assessment	Assessment performed by
Location		
Depth to water		Seasonal high groundwater
Was bedrock encounte	ered?   Yes If yes,	depth to bedrock
	□ No
