RE: Highway 31W Mini Storage Storm Drainage

Dear Hunter:

As you requested, I have reviewed the proposed rezoning documents for the Highway 31W Mini Storage site that I received from you on November 1, 2023 relative to potential storm drainage issues. Based on the proposed Conceptual Layout plan prepared by Klober Engineering Services, a proposed stormwater detention pond is shown in the southeast corner of the site.

The design of the stormwater system for the site during the site plan process must include considering the current maximum 100-year flow in the existing drainage ditch along the area of the south boundary of the site. The design of the proposed detention pond and all other general grading of the site must not result in an increase in the current elevation or quantity of stormwater flow along the existing ditch. Both the horizontal location, size, and elevation of the proposed detention pond and other stormwater system components must be designed to not increase the existing flows downstream of the site or alter the location of the existing flows.

No liability for the correctness or completeness of design or surveying performed by others is assumed by me or Robertson County by my review of these documents.

Please contact me if you have any questions or comments. Thank you for the opportunity to serve you.

Sincerely,

Rick Mayo, PE, RLS

Discussion & Observations:

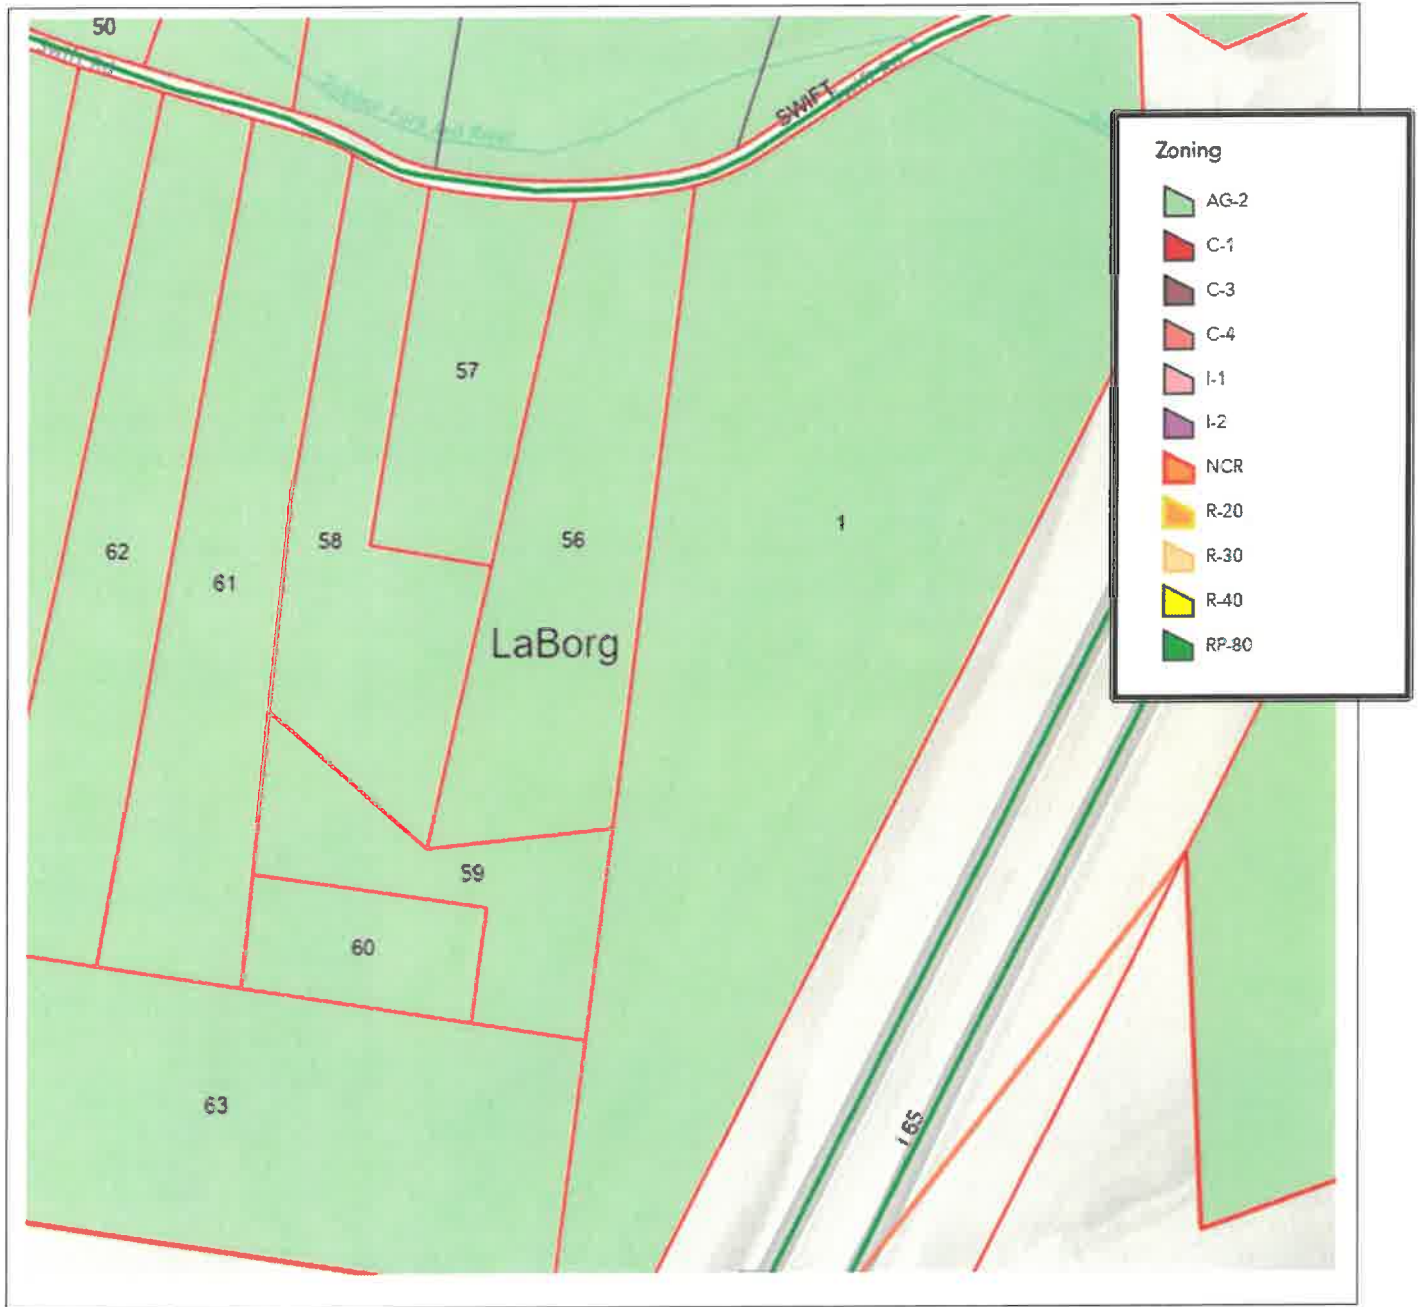

The applicant wishes to rezone 5.53 acres. The subject property is surrounded by AG-2 but has several surrounding lots that are nonconforming that would be considered RP-80 by today's zoning regulations.

Please see Exhibit 1 for zoning map exhibit.

The applicant's request to rezone RP-80 appears to be dimensionally appropriate.
