The Town of Snow Hill partnered with the Snow Hill Rural Fire Department to apply for a FEMA grant in the amount of \$32,000 for an LED informational sign. Thankfully, Snow Hill FD was awarded the sign last fall. The town has been working with NCDOT for right-of-way encroachments to ensure the sign was safely placed. This will benefit our town through posting of important dates, upcoming events and public notices in our town and county. It will also benefit our fire department in the retention of its membership. The town and fire department will be implementing a policy on the use of the sign regarding public request. Again, the sign was funded 100% through a firefighter retention grant program.
