**RE: Farmstead PUD Stormwater Construction General Permit Exemption**

---

Per the Preapplication Meeting Notes this project is required to submit a Washington State Department of Ecology Construction Stormwater General Permit. This project is exempt from that requirement. At no point will stormwater runoff generated with this project be capable of being discharged to the waters of the state. The irrigation canal that crosses the southern half of the project does not return to the waters of the state.

Thank you and please let me know if you have any comments or questions.
