RE: Huntsman Estates Stormwater Construction General Permit Exemption

Per the Preapplication Meeting Notes this project is required to submit a Washington State Department of Ecology Construction Stormwater General Permit. This project is exempt from that requirement. At no point will stormwater runoff generated with this project be capable of being discharged to the waters of the state. The irrigation canal that borders the site on the south and east property boundaries does not return to the waters of the state.

Thank you and please let me know if you have any comments or questions.
