Jennifer Ballar, Senior Planner

To Walla Walla County Public works 2-17-2023.

My name is Melvin Talbott and I have some concerns on this project. The current plan has the road and bridge being a lot closer to my house. My quality of life will suffer from the extra noise from the close proximity of traffic.

Also it will destroy some quality riparian habitat and good farmland. It should be noted that the ground is in a CREP contract with FSA.

Another concern is the river continues to change locations. It has actually moved since the test holes were drilled. I think the current location of the bridge would be a better choice.

Sincerely

Melvin Talbott
