

Pre-Planning

Quantitative Analysis

Conservation Strategy

Covered Species

Covered Activities

Plan and Term Area

Compile GIS data and impact ratios

Effects Analysis

Quantify Negative Impacts

- What's impacted?
- Where is it impacted?
- How much habitat is impacted?

Iterative Assessment of:

- Covered Species
- Covered Activities
- Plan Area
- Impacts

Develop Conservation Strategy

Quantify Positive Impacts

- Protect prairie habitat
- Restore prairie habitat
- Habitat protection and restoration will offset impacts of City operations over next 30 years

Develop funding solutions and strategies for:

- Program administration
- Conservation land acquisition
- Restoration/enhancement/maintenance/etc.

Implement Conservation Plan

Operational impacts are offset through the restoration and protection of habitat important to Covered Species
